"You know, I promised Jemmy G. H. MARTIN Carr's mother I would look after her boy, and when he fell sick I did all I could for him. He was not strong and the day before that night I carried all his luggage besides my own, on our march. Towards night we went in on else was tired, too, and as for Jemmy, if I had not lent him an arm now and then, he would have dropped by the way. I was tired out when I went ino camp, and then it was Jemmy's turn to be sentry, and I would take his place; but I was too tired, father. I could not have kept awake if I had had it until-well, it was too late !"

"God be thanked !" interrupted Mr. Owen, reverently. "I knew Bennie was not the boy to sleep carelessly at his post." They tell me to day, that I have a

Late that night the door opened softly and a little figure glided out and down the foot-path that led to the road by the mill. She seemed rather flying than walking, turning her head neither to the right nor to the left, starting as the full moon stretched queer and fantastic shapes all around her, looking now and then to Heaven, and folding her hands as in prayer.

Two hours later the same young girl stood at the Mill Depot watching the coming of the night train, and the conductor, as he reached down to lift he in, wondered at the sweet tear-stained face that was up-turned toward the dim lantern he held in his hand.

A few questions and ready answers told him all, and no father could have

THIS invention pronounced the "Ne Plus-ultra" of Saw Mills is destined to sweep all rivals from the field. Interlooking book and lever dogs are used by which the logs are pooceds and cANTED automatically. The head blocks are fitted with sliding racks which move forward and back and by this means a long sweeping log can be sprung straight, and tapering logs can be ut to the greatest possible advantage. When one log is sawed the Head Blocks are run back by friction ready to receive another log as the carriage is returning. The whole of this work is performed by a man who rides on the carriage. TO THE FARMERS OF MIRAMICHI.

We have been Manufacturing IRON FRAME MOWERS For the last four years, and are now offering to the farming community this, the combining greater 'excellence of mechanical simplicity together with greater durability and entire reliability for all the requirements of the field, than any other Mower extant.—In construction they are similar to the celebrated Walter A. Wood's Iron Frane Mower, and the Richardson Buckeye, both American Machines. Of the former there are over 200,000 in use, and the extraordinary number of 20,000 were manufactured and sold last season, by the Wood Company of United States. We have over 500 of our manufacture now in use, every one of which for exceptions) stands as a monument of the grand and unprecedented success of home manufacture and our enterprise. A list of our Agents in this section of the Province will be found appended, and farmers are requested to ask information of them relative to our Mowers in use in their respective localities, which will establish beyond doubt their unquestionable superiority over any other mower to be had in our market.

The facility of procuring all parts or plees within a nominal length of time must show beyond the shauow of a doubt the claims stift in enterprise has upon the farmers of the Maritime Provinces.

For the coming harvest of 1977 we will manufacture La Rightly in excesse of our numnas upon the farmers of the Maritine Provinces. For the coming harvest of 1877 we will finant facture LARGELY in excess of our numbers of last season, and trust that our growing enterprise may find such inducements held out to it as will be commensurate with its merits. Let it be remembered we have no hesitation a all times, in entering into a friendly competition in the field with any other machine in our market. WEGUARANTEE OUR MOWERS TO BE INFE RIOR TO NONE. Farmers would do well to enquire prices and terms before purchasing elsewhere.
