

SOUTH AFRICAN POLICY.

JOSEPH CHAMBERLAIN DEALS WITH PAST AND FUTURE.

Desired That Best Characteristics of Boers Be Preserved—No Intention of Packing the Country With Britishers, But Some Were Necessary.

London, July 29.—Mr. Chamberlain's appearance in the house of commons today was marked by a speech which won the applause even of such opponents as Henry Labouchere. Mr. Chamberlain dealt comprehensively with the past and future of South Africa.

London, July 29.—Mr. Chamberlain's speech evoked criticism of the financial features of the policy outlined for South Africa from Sir William Vernon Harcourt, James Bryce and others. Mr. Bryce said he hoped the National Scouts would not be used as police, but Mr. Chamberlain said he could not see why they should not be so employed, as he believed they would make admirable civil guards.

OIL IN MONTANA.

Million Dollar Company Incorporated to Work the Land.

Dimon, Mont., July 31.—The Rocky Mountain Oil Company has incorporated under the laws of South Dakota. The capital stock is \$1,000,000 in shares of \$1 each. Four hundred thousand shares have been reserved as treasury stock, which will be placed on the market, the proceeds to be devoted to the drilling of an oil well 2,000 feet in depth if necessary.

Won His Spurs on Martinique.

It was on the unhappy island of Martinique that King Edward's grandfather, the Duke of Kent, won his spurs as a soldier, says a writer in the London Chronicle. Prince Edward, as he was then, was given the command of the 7th Fusiliers at Gibraltar in 1791, but was soon afterwards transferred to Canada. In 1794 he sailed from Halifax to take part in the expedition against the French islands in the Caribbean, and after many hard battles about the base of Mount Pelee, captured Martinique from the valiant General Rochambeau.

Exhibition Matters.

The executive committee of the Exhibition Association met at noon Thursday and considered several matters pertaining to the approaching big show which is now less than a month away. They arranged the privilege for selling oysters and clam chowders, etc., to J. H. D. Turner, who will erect a booth on the grounds. There will be no art gallery this year, as the executive decided that the space it occupies can be utilized to better advantage.

KITCHENER'S LAST DESPATCH ON THE WAR.

Praise for Milner, Colonies and Colonialists, and Generals—Canadians Singled Out.

London, July 29.—Many pages of the Gazette today are filled with Lord Kitchener's final despatch on the Boer war, and his mention of officers and men who distinguished themselves while he was in command in South Africa. The same issue announces the general's new title as "Viscount Kitchener of Khartoum and of the Vaal and of Aspall, in County Suffolk."

In his last despatch, Lord Kitchener said of Lord Milner, the British high commissioner:—"In many difficult situations it was always the greatest relief to me to feel that I could always rely upon his unfailing and ungrudging assistance."

Referring to the deep obligations of the army to the colonies, the writer said no request of his had ever been refused by the colonial governments, and their consideration and generosity only equalled the character and quality of the troops they sent to South Africa or raised in that country.

UNITED STATES NEW WEAPON OF DEATH.

Time Fuse Devised Which Will Not Detonate Shell Till Limit of Penetration is Reached.

Washington, July 21.—The ordnance department of the army has succeeded in devising a new time fuse for armor piercing shells that does not detonate the shell until the penetrative ability of the projectile has been exhausted. With a shell equipped with this fuse loaded with the powerful explosive discovered by the ordnance experts, and fired from a 12-inch gun, a penetration of 14 inches of Krupp armor has been secured before detonation. The heaviest Krupp armor used in any battle in the world is only 12 inches thick. Heretofore it has been regarded as absolute protection against the best shell of the most powerful rifle in existence.

Ordnance experts all over the world have been trying to devise a fuse that would not detonate the shell until the limit of penetration had been reached. The great difficulty to be overcome lay in the tendency of the impact of shell and armor target to detonate the projectile through improper functioning of the fuse. Success in this regard would mean that with a rifle giving complete penetration the shell would be exploded on the inside of the vessel struck, inflicting damage many fold greater than if it exploded on the outside of the armor.

It has been found, however, that equal or greater results may be achieved with thick-walled shells loaded with a smaller quantity of the new explosive. With the new fuse, which is not exploded by the force of impact, these thick-walled shells did not explode until they had reached the limit of their penetration, and then the fragments of shell were driven forward. Of course, the properties and arrangement of the fuse are as great a secret as the formula of the high explosive.

Oil Trust Story Denied.

New York, July 31.—Regarding the cable report that the Standard Oil Company has entered, or will enter, into an agreement with the Rothschilds and Nobel interests to control the world's oil production, M. P. Elliott, the attorney of the Standard Oil Company, today made the following statement:—"I am authorized to say that the story is absolutely no foundation in fact. It is false from beginning to end. Furthermore, the Standard Oil Company has at no time considered a plan of this kind, and at no time has that company entered into negotiations about this matter."

LIVES TAKEN IN COAL STRIKE BATTLE.

TROOPS WILL REMAIN.

Russia Retains Arms in Manchuria—Robber Bands the Alleged Cause.

London, July 31.—The St. Petersburg correspondent of the Daily Mail says the order for the withdrawal of the Russian troops from Manchuria has been rescinded, and that country is overrun with Chinese robber bands. Quantities of Russian goods in transit have been looted, says the correspondent, and two Russian merchants in Manchuria were recently burned alive.

KING EDWARD PACES YACHT'S DECK UNAIDED.

His Majesty's Progress to Recovery in Every Way Satisfactory.

London, July 30.—King Edward's progress continues to be in every way satisfactory. During the day he slowly paced the deck of the royal yacht Victoria and Albert without any assistance and the exercise is reported to have done him good.

The Earl of Denbigh, one of the king's lords in waiting, speaking at a public meeting said he saw no reason why the king should not be strong enough to undergo the fatigue incident to the coronation on Aug. 9.

PROGRESS IN TRANSVAAL.

Much to Be Accomplished and Material Hard to Get

London, July 29.—The settlement of the Transvaal, says the Times Johannesburg correspondent, is proceeding with all possible dispatch, but it cannot be said that progress will be recorded by specific landmarks every day or week. Each department of state is working at full pressure, but the amount of work to be done is enormous, and the obstacles are removable only gradually.

In the public works department things are almost at a standstill, owing to the difficulty of procuring goods from the coast. There is not only about 20 years' arrears of work to catch up, but also the destruction of the last three years of the coast, and little can be done until the work is rebuilt. The material needed for all these purposes would at the present time, and little can be done until the rolling stock is procured for the railroads.

Big Tobacco Deal Reported.

Chicago, Ill., July 30.—According to accredited reports, the American Cigar Company, a wing of the Tobacco Trust, has absorbed its chief rival, the United Cigar Manufacturing Company. The price is said to have been \$10,000,000, with a profit of \$3,000,000 on the capital. William Best, of Best & Russell, admitted that such negotiations had been in progress, and that if they had been concluded, the interest of the merging concerns would be in maintaining secrecy as to the fact.

With the United Cigar Manufacturing Company out of the way, the Cigar Trust would have almost complete control of the trade. This rival concern, for which Chicago is the headquarters, is being organized with a capital of \$7,000,000 by the merger of Kerbs, Wertheimer & Scheffer, Straton & Storm and Hirschman & Mack, all manufacturers.

The selection of Best & Russell as distributing agents proved a highly remunerative and effective move. By quick action the firm practically cut out the Cigar Trust from a great part of Chicago's retail trade. With one move it secured a score of the chief cigar stands within the loop, thus depriving the trust of an important outlet for its goods. Through this and other equally special manoeuvres the American Cigar Company has been compelled to enter into negotiations for its rapidly growing rival, whose present manufacturing capacity is one million cigars a day.

Reign of Terror Opened at Shenandoah (Pa.); at Least Two Men Killed.

TROOPS ARE CALLED OUT.

Trouble Started as Officer Escorted from Work Two Non-Union Men--Mob Swelled to 5,000--Merchant Clubbed to Death--A Thousand Shots Exchanged.

Shenandoah, Pa., July 30.—A reign of terror compared with which the scenes enacted during the strike of 1900 seem insignificant, holds Shenandoah in its grasp tonight. Since 6 o'clock this evening the streets of the town, has been in the hands of an infuriated mob. Two of the borough policemen were shot, one perhaps fatally. Joseph Bedal, a leading merchant and cousin of Sheriff Bedal, was brutally clubbed to death and upwards of a score of strikers whose names at this writing could not be ascertained, were shot by policemen and it is expected that many deaths will result. Sheriff Bedal arrived from Potomac City at 7:45 o'clock with a posse of deputies. He has taken up his headquarters at the Ferguson hotel.

To an Associated Press reporter he advised that he asked Governor Stone to send the militia. The governor wired that if the citizens of the town petition for troops he will send them and a petition is being circulated for that purpose now. It is almost certain that the troops will be here tomorrow.

The trouble started about 6 o'clock this evening when Deputy Sheriff Thomas Bedal attempted to escort two non-union workers through the strikers' pickets. The strikers were dressed in their street clothes, but one of them carried a bundle under his arm and this aroused the suspicion of the strikers. They took him from him and when it was found to contain a blouse and overalls the man was taken from the deputy and beaten almost to death. In the meantime Bedal opened fire on the mob which had gathered by this time and emptied his revolver. Two of the mob were killed, one in the chest and the leg and the other in the foot. The deputy and the other strike breaker were now compelled to fly for their lives and the mob followed them to the Philadelphia & Reading Railroad depot. The depot was soon surrounded by an angry mob of five thousand which was becoming more threatening every moment.

Joseph Bedal, a hardware merchant and brother of the deputy sheriff, was seen in the crowd in an effort to reach his brother and the mob, divining that he was carrying ammunition to those inside the depot, seized him and threw him into the water. He was insensible. He died on route to his home's hospital.

Shortly after this, the entire borough was in the hands of the mob and they escorted the deputy sheriff and his man to an engine which had backed into the depot for that purpose. When the mob realized that their prey was about to escape, they surrounded the engine and the engineer was afraid to move. In the confusion the engine was started in a volley, dispersing the crowd for a brief period and the engine turned on full steam and got away with his men. Stones were now thrown at the engine and the heads of the police, whereupon Chief John Fry gave the order to fire.

At the first volley the mob fell back and several were seen to fall. Their retreat, however, was but momentary. They returned with revolvers, stones and even clubs. The police were again surrounded and a shooting ensued. Their retreat, however, was but momentary. They returned with revolvers, stones and even clubs. The police were again surrounded and a shooting ensued.

The injured policemen are: Frank Umatta, a policeman, shot through the head; William Fry, shot in arm and badly beaten; condition serious. Policeman Lengshier, shot in shoulder and hand, also beaten with stones and clubs; condition serious. It is estimated that upwards of 1,000 shots were fired and the wonder is that more fatalities did not result. More than 20 strikers, all of them foreigners, were shot and at least two of them died. Many merchants and politicians refused to sign the call for troops, fearing the miners will boycott them after the trouble is over and as the governor has made the sending of troops contingent on the petition of citizens, there is some doubt as to whether they will be sent.

The doctors of the town dressed the wounds of nearly 40 strikers all of whom were foreigners. It is known at midnight that four out of the six policemen were shot. Chief Fry received a slight wound in the hand, Yacopy was shot in the neck and head and may die; Ringheiser was shot in the hand and back, not serious; Lauries was shot in several places and cannot recover.

The following printed notice was posted by the mine workers all over town tonight:—"In view of the disturbances that have occurred in Shenandoah within the past 24 hours, in order to regard to the teaching and principles of the United Mine Workers as an organization, and contrary to the explicit instructions of the leaders, we call upon all members of the United Mine Workers to at once do all in their power to suppress lawlessness and to aid the officers in every way to maintain peace and good order. (Signed) 'JOHN FAHY, President Dist. No. 10, Harrington, Pa. July 29--At 11:45 p. m., the 8th and 12th regiments and G. O. (Continued on page 8, second column.)"

SIR WILFRID A GUEST.

Dinner Given by John Redmond in House of Commons.

London, July 30.—John Redmond, leader of the Irish party in the house of commons, entertained Sir Wilfrid Laurier and Premier Edward Barton, of Australia, at dinner tonight in the house of commons. The 22 guests included John Morley, Sir James Charles Mathew, lord justice of appeal; Father Cronin, of Buffalo; Darcy Scott, of Ottawa, and Editor W. T. Stead.

SUCCESS OF FIRST EFFORTS AGAINST MAFIA.

Conviction of Head of Sicilian Society on Murder Charge

Bologna, Italy, July 30.—The trial before the assize court here which had been going on for some time, of Trapani, Fontana and Palizzolo, the latter a deputy from Palermo, on charges of murder, was concluded tonight. The jury returned a verdict of guilty against Trapani and Palizzolo for the murder of Signor Miceli and against Fontana for the murder of the mother of Signor Notarbartolo. Sentences of 30 years' imprisonment were imposed upon the three guilty men, who are members of the Mafia.

RUSSIAN MINISTER NOT SATISFIED.

Wrote Disappointed With Attitude of Foreign Powers on Trust Plan.

London, July 30.—The St. Petersburg correspondent of the Times says that M. Witte, minister of finance, is far from satisfied with the attitude of the foreign powers toward the note issuance, and in a letter to the Russian note issue, he said that he was disappointed with the attitude of the foreign powers which are parties to the Brussels convention. His official organ publishes several columns in reply to the criticisms of the plan proposed for Russia for the holding of an anti-trust conference. It says:—"The Russian note made it plain that it would constitute a violation of existing commercial treaties if the decisions of the Brussels conference were enforced against Russia. The note did not treat it as probable that such a violation had been committed and did not raise the question of Russia's action if increased duties were imposed on her sugar. Moreover every member of the friendly government of the United States which arbitrarily raised the duties on Russian sugar. It is doubtful whether Russia suffered more than America from the increase."

Continuing the article says that if the duty was increased Russia could regard the increased importation of goods through the Russian market by foreign goods as a loss. The note did not treat it as probable that such a violation had been committed and did not raise the question of Russia's action if increased duties were imposed on her sugar. Moreover every member of the friendly government of the United States which arbitrarily raised the duties on Russian sugar. It is doubtful whether Russia suffered more than America from the increase."

Age 19; Weighs 649 Pounds.

An employee of the Washington government printing office, who has been spending his leisure hours in the gymnasium, tells a remarkable story of the newest giant. At Elizabeth City is a 17 year old boy, whose weight is 649 pounds. He is a normal in all respects except as to size and strength. He started the pace lately by pulling out of the water a boat which was usually so handled by seven men. His name is Lewis Lewark. He is said to be the heaviest man in the world. He has a chest of 68 1/2 inches, a waist of 54 inches, a neck of 18 inches, a forearm of 14 inches, a hand of 10 inches, a foot of 12 inches, a leg of 24 inches, a thigh of 24 inches, a calf of 18 inches, a heel of 10 inches, a toe of 10 inches, a nose of 10 inches, a ear of 10 inches, a finger of 10 inches, a thumb of 10 inches, a hair of 10 inches, a skin of 10 inches, a bone of 10 inches, a muscle of 10 inches, a nerve of 10 inches, a vein of 10 inches, an artery of 10 inches, a capillary of 10 inches, a cell of 10 inches, a molecule of 10 inches, an atom of 10 inches, a quark of 10 inches, a lepton of 10 inches, a photon of 10 inches, a gluon of 10 inches, a graviton of 10 inches, a neutrino of 10 inches, a selectron of 10 inches, a stau of 10 inches, a top of 10 inches, a bottom of 10 inches, a charm of 10 inches, a strange of 10 inches, a up of 10 inches, a down of 10 inches, a quark of 10 inches, a lepton of 10 inches, a photon of 10 inches, a gluon of 10 inches, a graviton of 10 inches, a neutrino of 10 inches, a selectron of 10 inches, a stau of 10 inches, a top of 10 inches, a bottom of 10 inches, a charm of 10 inches, a strange of 10 inches, a up of 10 inches, a down of 10 inches, a quark of 10 inches, a lepton of 10 inches, a photon of 10 inches, a gluon of 10 inches, a graviton of 10 inches, a neutrino of 10 inches, a selectron of 10 inches, a stau of 10 inches, a top of 10 inches, a bottom of 10 inches, a charm of 10 inches, a strange of 10 inches, a up of 10 inches, a down of 10 inches, a quark of 10 inches, a lepton of 10 inches, a
