JOIN CAMPUS ORGANIZATIONS

(Editor's Note)
(This list of Student Organizations is published to acquaint Freshmen and new students with the extra-curricular activities on the campus. ..All the organizations are sponsored by the S.R.C. and all are worthy of your attention.)

Brunswickan This weekly publication is now being produced from the new offices in the Student's Centre and requires a large staff to operate

efficiently. University Investment Syndicate The University Investment Syndicate was organized in February,

The aim of the Syndicate is to provide its members with a working knowedge of the Stock Market and business methods. This knowledge is obtained by the actual buying and selling of stocks on the market and the trade of shares among the members. Further knowledge is obtained by films, speakers, and the presentation of reports on Canadian companies and investment topics by the members. The program thus supplements theoretical knowledge with practical experience.

It attempts to povide films that are not on the circuit of local theatres. the showing of exceptional films good to have you on the campus once again as we begin the 168th year of teaching and instruction at The Social Committee The Social Committee is that committee which plans and exe-

the University of New Brunswick.
We had anticipated an increase
in enrollment but not the large
number of students who have registered. It is the largest entercutes all social functions at the University on behalf of the S.R.C. The chairman of the committee has the power to select seven members to serve with him Any suggestion you have will be weling class in the history of the university, if you except the years omed by the chairman andn comof veteran enrollments. In 1953 there were 217 new students, last year they numbered 277 and now we have 388. There will be a total enrollment of approximately 965 and these numbers will literally The chief functions of the committee are to manage three annual formal dances, set up the social calendar for each term and to pack our lecture rooms and labora-tories. However, new facilities are generally supervise all social functions on the campus from Sep-

on the way. The summer months have given us the opportunity to do more work on the grounds. You may have noticed that there has been a considerable amount of digging and leveling near the gymnasium. It has been our intention to make this area into a second playing field but the not infrequent situation of insufficient funds prevented us from going forward with such a project. This summer we turned to a number of construction companies for advice and Mr. W. D. Buchanan of Byers Construction was good enough to organize the leveling near the gymnasium. It affiliated with the Canadian Sunday evening in St. Anne's Hall was good enough to organize the plan into a joint venture. His own company has done a good deal of and recreation. Throughout the week discussion groups are held plan into a joint venture. His own company has done a good deal of the work, and we have received help from one of our graduates, Mr. Chaster Campbell of Tractors and Equipment. Trynor Construction co-operates closely with the local Equipment. Trynor Construction and Diamond Construction have The Canterbury Club is an association of all Anglican students agreed to do a part of the work, the Irving Oil Company has sup-plied the diesel fuel for the bullin the campus, meeting every dozers, and J. A. Likely has supplied the pipe for the drains. The university's contribution has been limited to the staking out of a field on the hillside. I am sure Church Cathedral. The activities of the club are both social and educational. Campus Co-ordinator
Appointed each year by the
S.R.C. His job is to advise any campus group of the most oppor tune time to hold a social func tion or meeting, and avoid date conflicts. Biology Club

This club formed three years ago invites all students interested in Biology. **Enginering Society**

The Engineering Society is the oldest society on the campus, was organized in 1902. The society arranges for lectures, debates and open discussions and emphasizes the importance of public speaking the importance of public speaking for engineering projects and sponsors a technical paper contest among its members. Prizes are awarded annually to the winners. An annual dinner is held for the students and professors. A store for engineering supplies is located in the civil engineering building.

preciate such a fine building. I do not agree; and I have maintained that when surroundings are plea-sant and the furnishings adequate then there is no difficulty in keeping things in order. I am counting on you to prove that my conten tion is correct when you begin to make full use of this new addition to the campus. Mr. Jack Murray

finished and ready for use. It has been said that it is too luxurious

and that the students will not ap-

in meeting the cost of this building. They have asked me to convey

try building has been delayed, but it has not been abandoned. Plans are now being finalized, all of our difficulties appear to have been surmounted and we will commence construction in October.

During the past two years I have been reminded more than once that, while the chemists were plan ning for a new building, the En-gineering faculty has become the largest on the campus. This year it will make up nearly one half of the student body. I have held a number of meetings with the gov-ernment in an effort to work out a solution to the crowded condi-tions that now exist in the two Engineering buildings. Happily we have obtained approval for the we have obtained approval for the financing of a new engineering addition. It will provide for an additional 21,000 sq. ft. of floor space and the plans are already well underway. Construction will begin in May of next year.

Again this year we welcome several new members to the university faculty. Professor R. L. Rosenberg has come as the new head of the department of Mathematics. Other new members of matics. Other new members of this department are professor Louis Ysner, Mr. J. C. Hayes and Dr. E. J. Alexander. All three departments of engineering have new faculty members. In Electrical Eng. there is Mr. Douglas Rogers, Mr. Walter Smolinski and Mr. Robert Burridge. Mr. Fred B. Spinney has joined the department of Mechanical Engs. and Mr. Frie Galland the department Mr. Eric Garland the department of Civil Engineering.

Other new members of faculty are Dr. W. E. Hale of the Depart-ment of Geology, Mr. Dugald C. Blue of the Department of Educa-tion, Dr. Walter Baker and Mr. N. R. Isenor of the Department of Physics, Dr. M. C. Davis of the department of German and Mr. Noel S. Jenkin of the Department

I should say a word about place-ment, not only for jobs upon grad-The Lady Beaverbrook Rink is nearly finished and will be opened ment, not only for jobs upon grad-uation but also for summer em-ployment and for work during the university year. We have estab-lished a central office under the direction of Mr. A. A. Tunis, the university's public relations officer. All inquiries from employers will be sent to him and he will look after the placement of students by the Chancellor during his annual visit to Fredericton. I think you must agree that no university in Canada can boast of such a magnificent structure. It is a tremendous addition to our athletic fac-ilities and one that we feared might never materialize. Now it is a reality and will be put into operaafter the placement of students who wish to avail themselves of his assistance.

Lord Beaverbrook will arrive in Fredericton before the end of this week. He is most anxious to see Recent reports indicate that the shortage of university graduates his new building, and I would hope that the student body will express to him their appreciation for this continues and that no profession is over-crowded. This is clearly a good time in which to be in univeratest addition to our athletic plant.
The Memorial Student Centre is

Each year I have asked that you get down to serious work early in the first term, and I have cautioned against letting the weeks slip by. Now, I know that in every class there are a few students who can postpone work until February and still do well in May. Their advice is usually the opposite of mine and I do not intend to challenge their ideas. However, I would like to point out that there is little evidence to prove that it works for the majority of students. I would again suggest that you adopt a resolution of hard work and conscientious endeavour, and that you put it into practice during the first term, for it will prove to be little more than an empty hope if brought into operation in April.
We may sympathize with your good intentions, but, in the final analysis, we must judge you on the basis of your accomplishments.

In its search for trained perconnel, industry is becoming increasingly interested in the edu-cated professional. You will need to be something more than a conpetent technician if you are to be in demand upon graduation. Industry is searching for liberally educated professionals and a recent survey indicates that com-panies are now eager to hire liberal arts graduates "because they want men who can deal with people and later become executives."

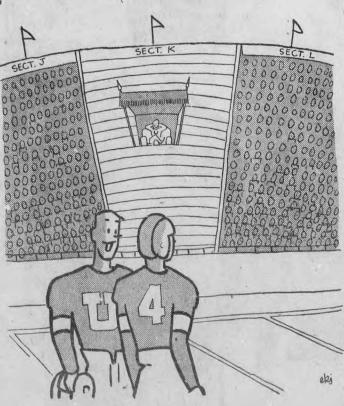

The need is for educated men and women, and I would like to remind you of the definition of such a person as given by the president of Queen's University. Dr. McIntosh has said:

"A person who bears the mark of education is one who can range freely beyond his parish pump, whether that pump be a great metropolis, the quiet countryside, a busy market place or an ivory tower built of limestone. Man rises, at times, above the animal world not merely because he has thumb which turns inwards. because by communication and record he can experience the culture of many lands and be the heir of all the ages.

"With technical competence, honest detachment, mastery of words, freedom in time of space, the educated person finds balance and poise. It is not the inert balance are the space of the sp ance of a pyramid set on a rock. It is the balance of a well-found vessel in swift moving waters. The test of maturity is the ability to live with uncertainty and to reckon with the risk'

I feel that last year definite progress in the life of the University of New Brunswick. definite progress in the fire of the University of New Brunswick. There were few incidents to mar the course of events and only some ancient cannon received a shaking-up. This year, the Jones
Boys once more ring out from
the Beaverbrook Tower. Those
gentlemen were never able to make
their saw-mill pay, but then they Noel S. Jenkin of the Department of Psychology and Sociology.

Both Dr. A. G. Bailey, Dean of Arts, and Prof. James O. Dineen, head of the department of Elect. Eng., are on leave of absence. Dr. Desmond Pacey will act as Dean of Arts and Mr. Robert Collier as head of the Department of Elect. Eng.
