stergrass are poor—H. P.

ANTHONISH CO. NOVA SCOTIA.

ANTH

OUESEC.

PANVILLE, August 7.—The weather is dry and warm. The hay crop is good; grain crop heavy: corn and root crop god. The latter seemingly is not affected by the dry westher. There is a good crop sold the settlement of truit. Butter, 25c a b.; and the settlement of truit. Butter, 25c a b.; and the settlement of truit. Butter, 25c a b.; and the settlement of truit. Butter, 25c a b.; and the settlement of truit. Butter, 25c a b.; and 25c according to the settlement of the s

150 octh—M. D. R.

SILAWVILLE, August 11.—Farmers of
Postiac Co. have cut one of the best hay
crops we have had for years. The clover
was not winter killed, and the new seeding swint to abundance of rain, is comordered to be the seed of the control of
pasture, and the dairy men are getting
plenty of milk. The yield per acre for
hay will run about two tons. Wheat,
pes, and oats, corn and potatoes, and ali
rod crops are promising good returns,
post crops are promising good returns,
prosperious year.—J. Aling forward to a

crop. Very little clover was winter killed, and the dampness of April and the heat of May was favorable, and clover was an excellent crop. Occasional showers in June helped the timothy, and the majorily of farmers report a cut far above last year in quantity. Very few have below an average crop. The warm weather duration of the work of the weather was an average crop. The warm weather durabally, and the receive meadows quite badly, and the receive meadows under the whole the hay was easily cured, and all the farmers unite in saying that this year's crop is the best quality produced here in five years—J. A. Moriarty.

DURHAM CO., ONT.

DURHAM CO., ONT.

BLACKSTOCK. August 6.—Harvest is in full swing. Cutting will be pretty well through by the 16th or 15th. Crops in Cartwright are looking fairly well. A quantity of the oats have failed to fill. There will be a quantity of light grain. Spring wheat is not good. Barriey is a very good crop. Peas will probably yield well—R. Y. P.

well.—H. F. P. The sease will probably yield well.—H. F. P. The sease will probably yield well.—H. F. P. The sease will be seased as a very cately month for making hay. Early cut hay was secured in good shape. Beaver hay will not be cut for a week as the meadows are under water. Corn, roots, and pointoes promise to be a good crop; also apples. Hucktheberries are a thin crop; raspberries and blackberries are very pleatiful. The hay crop in this section of the sease was a sease of the sease which we will be seased as the sease which we will be seased as the sease will be seased as the sease which we will be seased to be seased as the sease which we will be seased to be seased as the sease which we will be seased to be seased as the sease which we will be seased to be seas

WESTERN ONTARIO

WESTERN ONTARIO

BRIE VIEW, August 7.—Harrest is about ended here. Threshing is the order of the day. Grain is turning out better than expected. Oats, wheat and barley promise a very fair crop. Since the last rains pastures have been looking up. Dairy cows are giving a good flow. Since the creamery men control the milk business, beef cattle seem to be more plentiful. Hogs are selling at \$5.50; butter. \$500; Dairy coggs, 160. Nome farmers are fighting ragweed.—P.

ragweed.—P. B.

GOLSPIE. August 9.—We are all very busy hauling in grain this week. We will almost finish the harvest if the weather keeps dry. Oats are very light in grain, in this section. Fall with the property of the p

creameries this enason.—A. M. McO. the creameries this enason.—A. M. McO. The MDDLFSEX CO., ONT.
TEMPO, August II.—Weather continues dry: a day's rain would be acceptable. Harvest is mostly gathered, and is inclined to be light. Grain will average to the state of the continue of the co

acreage will be short.—J. E. O.

HURON CO., ONT.

HURON CO., ONT.

BLYTH. August 7.—Weather conditions have had mush to do with the quality of the crops. In sections where plenty of to the average, where other neutrino to the average, where other severely for the want of rain; principally the lake section. The windstorm of a couple of weeks age did much damage to fruit, corn, and so forth, while one strip of country get haled out completely. The apple crop of haled out completely. The apple crop is the fair that the country of the country.—R. R. S.

## AYRSHIRE NEWS

Farm and Dairy is the recognized exponent of the Dairy interests of Canada. Breeders of Ayrshire Cattle and all members of the Canadan Ayrshire Breeders' Association are invited to sond items of interest to Ayrshire breeders for publication in this column.

A. S. TURNER & SON'S AYRSHIRES

A. S. TURNER & SON'S AYRSHIRES

One of the finest herds of Ayrshire eatter in Catala, which in this case is to say the world, so the control of the first and the control of the control o

good producers. Almost without exception they were long low set animals, showing strong, vigorous constitutions, well developed udders and good tests, well developed udders and good tests, Turner is able to hold his own, h. Mr. Turner is able to hold his own, h. Mr. at the London, Ont., exhibition, He intends to show at the Toronto exhibition this year.

at the London, Ont., exhibition. He intends to show at the Toronto exhibition this year.

One of the best animals in the herd is a considered to the constant of the constant

7,39.50 the nilk and 302.54 bbs. butter fat in 28 days. Scotland Princess 2nd, a mature cow, has a record of 10,328 bs. of milk and 45,52 bbs. of butter fat. The first cow was started by Mr Turner in the Record of Performance test in February, 1938. This animal was Barton Princess, which produced 9,350 lbs. of milk and 381 bbs. of butter fat. The records made by Mr. (Concluded on Page 19.)

## Bigger Cream Checks Sure For Years To Come

Just because a separator skims close is not sufficient reason for buying it. Equally important is the question of durability

An I H C Cream Harvester was put to a year's test at the factory—running steadily for 10 hours every working day. This is equivalent to 20 years of ordinary use, figuring on a basis of half an hour's daily service. Yet in all this time there was no perceptible wear. What better proof of I H C durability can you ask?

H C Cream Harvesters Dairymaid and Bluebell

have been paying cow owners big dividends for years. Their skimming qualities are unequalled—their ease of turning—ease of cleaning—and durability are easily proved by the testimony of owners. Why not investigate?

durability are easily proved by the testimony of owners. Why not investigate You will find that I H C fream Harvesters are the only separators with dust-proof gears, which are easily accessible. The frame is entirely protected from wear by phosphor bronze bushings. The I H C has large shafts, bushings, and bearings. The patented dirt-arrester removes the finest particles of dirt from the milk before the milk is separated.

I H C Cream Harvesters are made in two styles—Dairymaid, chain drive, and Bluebell, gear drive—each in four sizes. The I H C local agent will be glad to point out the above features and many others, or, write nearest branch house for catalogues.
