## FRictionless EMPIRE CREAM SEPARATOR

The Bowl Spins on the Balls Just Like a Top.

By the ingenious arrangement of the three balls of our bottom Frictionless Bearing, the bowl of the "Empire" is always kept perfectly balanced, because the point of the spindle sets between the three balls and automatically adjusts itself to the proper centre. The bowl spins on these balls just like a top, only at a speed far greater and without a sign of vibration when at skimming speed. This absence of vibration is one reason why the "Empire" is the easiest running cream separator in existence. Any wear that occurs is taken up by the point of the spindle which is the only point of contact. As the point of the spindle is removable, it can readily be renewed, and at a trifling cost. And every particle of precious butter fat goes into the cream can. In fact, we absolutely guarantee the "Empire" to skim equally as close as any separator in the world. **Free Trial** to prove it. Write for our **Free Dairy Book** which explains how to make more money out of your cows. It is a veritable gold mine of information.
