

Whipple Humane Horse Collars

Will permit you to get more work from the horses you use than is possible from any other way. They are so constructed as to apply the greatest amount of pulling space on the animal, and yet leave all that part of the shoulder free from strain that was never intended for strain (study the illustration), and you will notice an ill-fitting collar will draw on the top and the bottom of the scapula bone. Nature intended the draft to come between these two trouble points. Whipple Humane Horse Collars work where nature intended the draft to work. See your best saddlery dealer, if he has not got them, write us, and we will tell you who will supply you.

EUREKA

SANITARY CHURN

There's no comparison between the ordinary wooden churn and the "EUREKA". Barrel is stoneware—top is clear glass. Besides being absolutely sanitary, the glass top enables you to see how the churning is coming along without opening the churn. Also made with Aluminum top. The "EUREKA" is the easiest churn on the market to operate. By tilting back the frame until the weight rests on the wheels, the churn can be quickly and easily moved—while the barrel remain upright. If your dealer does not handle the "EUREKA," do not take a substitute but write us for catalogue. **EUREKA PLANTER CO. LIMITED, WOODSTOCK, ONT.**

DE LAVAL

CREAM SEPARATORS

No Excuse for any Cow Owner Being Without One

There is no reason why any cow owner who sells cream or makes butter should be without a cream separator, and there is no excuse why he should not have the best separator.

Any creameryman or experienced dairyman will tell you that a good cream separator will give you a great deal more and a great deal better butter than you can make with any gravity setting system, and equally, of course, more and better cream, if you are selling cream.

The DE LAVAL is acknowledged by creamerymen and the best posted dairymen the world over to be the "World's Standard" and the one and only separator that always accomplishes the best results possible and always gives satisfaction.

You cannot make the excuse that you can't afford to buy a DE LAVAL, because it will not only save its cost over any gravity setting in six months and any other separator in a year, but is sold either for cash or on such liberal terms that it will actually pay for itself.

A little investigation will prove to you that the truth of the matter is that you really can't afford to make cream or butter **without** the use of a DE LAVAL Cream Separator.

The nearest DE LAVAL local agent will be glad to demonstrate this to your own satisfaction, or you may write to us direct.

DE LAVAL DAIRY SUPPLY CO., LIMITED

MENTION THE FARMER'S ADVOCATE WHEN WRITING ADVERTISERS.

PEERLESS PERFECTION

The first cost should be the last cost.

You should put up a fence that will give you real fence service first, last and all the time. The cheapest is always the most expensive in the long run on account of repairs necessary.

Peerless Saves Expense

because it is the poultry fence that never needs repairs.

Peerless poultry fencing is made of the best steel fence wire—tough, elastic and springy—and will not snap or break under sudden shocks or quick atmospheric changes. Our method of galvanizing positively prevents rust and will not flake, peel or chip off. This feature alone adds many years to the life of a fence.

The joints are securely held with the "Peerless Lock" which will withstand all sudden shocks and strains yet is so constructed that Peerless Poultry Fence can be erected on the most hilly and uneven ground without buckling, snapping or kinking.

The heavy stay wires we use make Peerless Poultry fencing rigid and upstanding thereby preventing sagging and needs only about half as many posts as other fences.

We build our poultry fence stronger than seems necessary in order to keep marauding animals out and close enough to keep the smallest fowls in. Many of our customers are using this style as a general purpose fence with entire satisfaction.

Peerless Poultry Fence when once put up is always up and will look better, wear better and serve you better than any other fence built.

Our Catalogs are all Free to You

Write us for literature and address of nearest agent. We also manufacture a complete line of general fencing, farm gates, walk gates and ornamental fencing. Agents almost everywhere.

IHC Engines

Furnish Plenty of Power

WELL as you know your ordinary farm power needs, you can never tell just where you are going to need extra power, and need it badly. An engine with ten to twenty per cent of reserve power will often save enough to pay for itself, just by its capacity for carrying you safely through emergencies.

IHC Gasoline Engines

are large for their rated power—they are designed to run as slowly as possible because that increases their durability. They are equipped with a speed changing mechanism which enables you to vary the speed at will. By changing the speed they can be made to develop from ten to twenty per cent over their rated power with little detriment to the engine, and at a cost for extra fuel so slight that it will never be noticed on the bills for gasoline. As soon as the need for extra power is gone, the engine should be slowed to normal speed.

When you buy a gasoline engine, buy one you can depend upon; one that has plenty of power, one that is built to operate at lowest cost for fuel and maintenance. Buy an IHC engine—1 to 50-H. P., vertical or horizontal, water-cooled or air-cooled, stationary, portable, or mounted on skids, built to operate on gas, gasoline, kerosene, distillate, or alcohol. Kerosene-gasoline tractors in all styles from 12 to 45-H. P. Sawing, pumping, spraying, grinding outfits, etc.

See the IHC local agent and get catalogues and information from him, or, drop a line to the nearest branch house.
