THE GATE IN MACBETH

TROM my begish day I had always felt a great perplexity on one coin in Macbeth. It was this, the knocking at the gate, which succeeds to the murder of Duncan, produced to my feelings an effect for which I; never could account. The effect was that it reflected back upon the murderer a pecpiair awfulness and depth of solemnity are, however death at the comprehend this, for mare we'are in ever could see their should produce such an effect.

Here I pains for mar normal, to exhort the reader, never to pay any attention to his understanding, when it same a coposition to me other faculty of his min. The mere understanding, however useful and indispensable, is the meanest faculty in the human mind, and the most to be distrusted; and yet the great majority of people frust to do nothing else, which may do for ordinary life, but not for philosoph instances that I might produce, I will create which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as, for instance, to report appearance which depends upon the laws of that sciences as a form man—was gone, vanished, extinct, and the sciences appearance which depends upon the laws of that sciences as a form man—was gone, vanished, extinct, and the sciences appearance which depends upon the laws of the sciences and the sciences and the sciences ar

On which murders, by the way, I must observe, that in one respect they have had an ill effect, by making the connoisseur in murder very fasticious is his taste, and dissatisfied by anything that has been since done in that line. All other murders look pale by the deep crimison of his; and, as an amateur once said to me in a nuerulous tone. There has been absolutely nothing doing since institute in a nuerulous tone. There has been absolutely nothing doing since institute in the deep crimison of his; and, as an amateur once said to me in a nuerulous tone. There has been absolutely nothing doing since institute and the deep syncope and since the door with the genius of Mr. Williams. Now will be remembered that in the first of these murders (that of the Marse) the same ineident (of a knocking at the door soon after the work of extermination was complete) did actually occur.

Here, then, was a fresh proof that I was right in relying on my own feeling, in soprosition to my inderstanding; and I arain' set my self to study the pushem, as leastful solved it to my own satisfaction, and my solved it to my own satisfaction and my solved it to my own satisfaction and my solved it to my own satisfaction, and my solved it to my own satisfaction and my solved it to my frost and snow, rain knd dew, hail-storm and shunder, which are to be studied with entire submission of our own faculties, and in incident of coarse and vulgar horror; and for this reason, that it flings the interest exclusively upon the natural but imoble instinct by inhift we cleave to life; and instinct which, as being indispens ble to the primal law of self-preservation, is the same in kind (though different in degree) amongst all living creatures: degree) amongst all living creatures;
