Mr. Rykert Says the Republic and B. C. Are Looking Well.

COPPER ORE FROM THE COXY

The Report of the Managing Directors of the American Eagle Company on the Nevada-Another Smelter-The Tamarac is Looking

Mr. E. G. Rykert, of the firm of Me-Mr. E. G. Rykert, of the stock advanced in price and then the Slocan and East Kootenay districts.

Hamilton, 0; Heathcote ct. Bullen, b. Grogan, 11; Forbes run out, 3; Brown from a trip through the Boundary Creek there was a sudden fall in its value. An In East Kootenay he reports that there country and Republic camp. In speaking English lord lost a large sum by the down is a great deal of development work in about his trip Thursday he said that he was very much pleased with the B. C. mine in the Boundary Creek country. He said anyone who wouldn't be pleased with the said to be the intention of Messrs. Fox & anyone who wouldn't be pleased with the said to be the intention of Messrs. Fox & group, near Windermere, which is under B. C. would be hard to satisfy. Mr. Ry-Ross to develop them on an extensive bond to Hon. C. H. Mackintosh, is showkert thinks favorably of the Boundary country generally, and says that it will not be long after the railway is completed into that section before some of the mines there will commence to pay dividends. The condition of the Republic mine, he is very good. The intention is to push the development work as vigorously push the development work as vigorously as possible and to increase the output. See that this meeting a dividend will be declared and the company will preside trude yesterday, and says he saw some president of the company, will preside fine looking copper ore which came from the former. Both properties are looking speeches. The New Gold Fields of British well, and the determination is to explore Columbia, for the year ended June 30th, them thoroughly. Mr. Rykert will leave made a cash profit of £17,380 14s. 3d., to within a day or two for the Slocan for the purpose of inspecting the Payne. Ss. Id. brought forward from last year, from the Slocan he will proceed to East making a total of £21,715 2s. 4d. This the purpose of inspecting the Payne. From the Slocan he will proceed to East Kootenay for the purpose of looking over the North Star, and from East Kootenay he will proceed home to Montreal.

The American Eagle.

At the recent meeting of the sharehold

At the recent meeting of the shareholders of the American Eagle Gold Mining company, Mr. R. C. Pollett, the managing director, submitted the following report on the condition of the property:

"In the first place let me call your attention to the fact that our company is in a peculiarly healthy and prosperous condition. Last November it purchased the Nevada mineral claim, then in course of being crown granted, the title to which has since been perfected, registered and transferred to this company. The property is nearly a full claim, containing 48 1-2 acres, and is situated less than a mile from the railroad at Porcupine creek, in from the railroad at Porcupine creek, in the Ymir district. At the time of acquiring this property a shaft 35 feet deep was the only work done. Upon the 9th of June this year development was resumed with the most gratifying results, and has been continuously pushed ever since, and is still going on. The showing at the shaft forced the belief that we had a fissure vein, cutting the formation at nearly right angles, and our recent exploits.

The Sailor Mining company of Camp Mc-Kinney has just purchased from the Jenckes Machine company a 35-horse power of the case of beyond any contention. It lies in a con- and steam drills. tact of porphyry and quartzite. The work that has been done since June 9th conthat has been done since June 9th con-sists of numerous surface trenches, expos-ing the ledge for fully 500 feet down the side, with a varying width from three to seven feet. As this ledge does not crop at any point and lies bedoes not crop at any point and lies beneath the wash or loose gravel from five
to 15 feet deep, it has been necessary to
move an enormous amount of dirt to
demonstrate the facts which we are now
in possession of, and which are of immense value to the company. Besides this
thispiper we have companyed two tunstripping we have commenced two tun-nels, aggregating about 70 feet. They are tunnel has 4 1-2 feet of ore at the face. The ore consists of a fine concentrating quartz, carrying gold, silver and lead. The following assays have been obtained from company, that in tunnel No. 2 ore of a ore taken from the surface, shaft and face of upper or No. 1 tunnel: \$34, \$38. 70, \$25.15, \$7.47, \$6.37, \$32.61, \$38.88, \$13.17. "The vertical depth between

No. 1 and No. 2 is about 140 feet, and it is my intention to start another tunne down the mountain with the vertical depth between. We would then have at least 450 feet vertical depth left before reaching our lowest boundary line, and about the same depth above tunne No. 1 before reaching our upper boundary line. With three tunnels running we can \$16.53 to the ton. The ore is free milling. easily, quickly and economically carry on development and confine our operations entirely within the ore bodies.

"The water power contiguous to the Nevada is of immense value, and will greatly reduce the general operating expenses later on. The luxuriant growth of timber is also a great feature."

Will Build a Large Smelter.

Paul Johnson, well known as the designer of the Hall Mines smelter, is in Nelson on a business visit, says the Nelson Tribune. He will leave for Greenwood in a day or two, where as the representative of an English syndicate with \$3,000,000 capital, he will superintend the construction of the largest smelter in Canada. The work will be begun at once and with ordinary fortune, Mr. Johnson says that it will be completed by the 1st of November 1. ber. The company erecting the new plant is the British Columbia Copper Smelting company, with headquarters in London, England. The plant will be of the most is the British Columbia Copper Smelting company, with headquarters in London, England. The plant will be of the most modern pattern, and will be devoted to the treatment of copper ores exclusively. Those of the Greenwood district are well known to contain just about the proper quantities of lime and iron and the other fluxes to make them practically self-fluxing. Up to the present time, the Hall Mines smelter has the largest copper stack in the world, capable of treating about 250 tons of ote per day, and it was one structed by Mr. Johnson. He is now soing to build a still larger plant, which will be the second time the largest stack in existence. The intention of the new company is to enter the field in competition with both American and Canadian smelters, and as the Canadian smelters at the present time do not stempt to treat all kinds of copper ore, the new plant expects to get a fair share of the work of the district.

Accompanying Mr. Johnson is John O. Norbon, of the Union Iron Works of San Francisco, to whom the cuntract for all of the iron work has been let. Mr. Norbon will also look after the matter of supplying power to the plant. At the present they are considering a proposition from the Cascade Power company, who

present they are considering a proposition from the Cascade Power company, who to transmit the amount of power red a distance of 29 miles, the whole plant to be run by electricity. If this existence miserable.

Celery Compound. This great banisher of disease is not in the experimental stage like the vast majority of advertised remedies; it is a true saver of life—a cure for the troubles that now make your existence miserable.

MINING does not prove satisfactory the smelter will likely erect a steam power plant in connection with its own works.

THE GOLDEN CACHE.

Fox & Ross of Toronto, Have Purchased

The firm of Fox & Ross of Toronto, has purchased the property of the Golden Cache company, near Lillooet. Professor Montgomery, the mining expert, is examining the properties with the properties of the company of the properties with the properties of the company of the properties with the property of the Golden Cache company of the ining the properties with a view to de-termining their value, and outlining the best method of operating them. The properties consist of the Jumbo, Ruby, Golden Eagle, Golden Stripe and North Star, located on Cayoosh creek, Lillooet district. It will be remembered that the Golden Cache company was organized on July 10th, 1897, with a capital stock of \$500,000.

Will Declare a Dividend.

Captain James Morrish, consulting gineer of the New Gold Fields of Brit-ish Columbia, announces that the annual is a further profit of £2,915 12s. 6d., derived from premium on shares sold. This latter amount of £2,915, 12s. 6d., to latter amount of £2,915, 12s. 6d., to gether with £2,048 7s. 6d. transferred from profit and loss account (making £5,000), has been carried to a reserve fund, leaving a net balance of £16,617 16s. 10d. available. The directors recommend the payment of a balance dividend at the rate of 20 per cent per annum free of income tax, carrying forward £8,-212 2s. 3d. to next account.

Machinery Purchased.

The Centre Star Friday purcha a 60-horse power boiler and a 200-gallon a minuted sinkink pump from the enckes Machine company. The same company has just sold to the Rathmullen company a three-drill compressor, and a 50-horse pow er boiler. The War Eagle and Buckeye company of Greenwood camp has just purtion has demonstrated this to be the case er boiler, a 20-horse power hoist, a pump

Mr. James D. Sword, M. E., returned

Friday from an extensive trip through

Nelson—Jowett b. Bullen, 5; William

son l. b. w. Hamilton, 4; Norcross b is a great deal of development work in J. Elliott, b. Grogan, 2; F. Elliott run fall of the shares. There was a sort of an inquiry into its affairs, and finally operations ceased. It is claimed that the erations ceased. It is claimed that the had with Mr. Sword yesterday he stated had with Mr. Sword yesterday he stated that it was reported that the Red Line ing up remarkably well. It is stated that a large body of phenomenally rich a business visit.

has penetrated the vein for a distance of has been in town for several months, 10 feet, and the hanging wall has not yet and the railway men and his other been met. This property bids fair to be friends are endeavoring to make his one of the largest silver-lead producers in stay as pleasant as possible. one of the largest silver-lead producers in Canada. The North Star is about to erect Mr. Hector McRae has re made a cash profit of £17,380 14s. 3d., to which has to be added the sum of £4,354 a tramway for the branch railway, which will be added the sum of £4,354 be a grow from the branch railway, which will be a grow from the property forms. He left a grow from the branch railway, which will be a grow from the property forms. be a spur from the main line and will be they will come to Rossland in about a constructed to and a little beyond Kimweek. It is Mr. McRae's intention to making a total of £21,715 2s. 4d. This sum, after deducting the amount of the interim dividend paid at the rate of 10 per cent per annum, leaves a balance of £18,702 4s. 4d, in addition to which there is a further profit of £2,915 12s. 6d., deep the sum of the sullivan group, week. It is Mr. McRae's intention to erect a commodious residence here. Week. It is Mr. McRae's intention to erect a commodious residence here. Sullivan group, is showing up remarkably well. The rail-interim dividend paid at the rate of 10 round should be completed to the North round Carpet company, who is visiting the principal mining camps. left Rossland yes—the well known laws. Perry creek, on the well known large tion. Messrs. Neal and others have bonded the Estrella group there for \$150,000.

"Around Fernie, the coal and coke sec-tion, there is considerable activity, and the coke ovens now under construct will soon be finished. When this is do will soon be finished. When this is done there will be a total of 250 ovens. This number will be ample to supply the smelt-ing requirements of British Columbia and to allow a considerable surplus for export to Great Falls and other American west ern smelting centers. The management of the company is now in the hands of Mr. Johnson, who succeeds Mr. W. B. Blackemore, who recently resigned. Mr. Johnson is an old and able mine operator of many years experience, having had charge of important mines in the Pocahantas coal fields of Virginia. The new superintendent of the mines is Mr. Robert Fisher a coal miner of good experience in the min ing sections of Great Britain and India.
"In the vicinity of Moyie City there is considerable activity. On the Lake Shore group, recently purchased by the Canadian Gold Fields syndicate, a seven-drill com-pressor is being installed. The plant will

e in operation in a few days. "Around New Denver most of the mines are closed down on account of the disagreement between the mine owners and the men over the eight-hour law; in fact, the whole of the Slocan country is practically closed down. It is hoped that here will soon be an adjustment of the differences between the two parties at

"The Bosun mine, under the management of Mr. Sandiford, has made a phenomenal showing in the past few months and is regarded as one of the big producers of ore in the Slocan district.

"The Galena mines were recently pur-chased by Mr. Cecil Hand for Mr. A. W. chased by Mr. Cecil Hand for Mr. A. W. McCune and others of Salt Lake City. The price is withheld, but as the property is a valuable one it must have been erry is a valuable one it must have been from the Novelty, a good large sum. From the Novetty, which adjoins the Galena mines, and which is believed to have the same ledge, nearly 400 tons of rich galena ore has been shipped. The property is under lease to Messrs. Benedum & Co. This property is regarded as having a bright

"The California above New Denver, is being incorporated and the work of developing it will be commenced at once. "At Sandon the big mines are about all shut down and with the exception of a small amount of development work nothing is being done. The Minnesota Silver ing is being done. The Minnesota Silver company, operating the Ivanhoe group, near the Slocan Star, has ordered a fivedrill compressor plant. This will be used in the driving of a 4,000-foot tunnel to tap the vein at much lower depth than hitherto. When completed this will be the finest tunnel in the Slocan. There the finest tunnel in the Slocan. There will be room in it for two tracks and it will be lighted throughout with electricity. It is now in for a distance of 1,400 feet. The plant will be brought in in sections and will be packed on the backs of mules to the site where the plant is to be erected. The plant is being supplied

"The property familiarly known as the "The property familiarly known as the Paris Peak group, which is owned by Patrick McCune, and which is located on the north fork of Kaslo creek, has been bonded by Mr. George Hughes and others for \$75,000. This is a silver lead property of considerable merit.

"On the lower level of the Payne a large body of one has been struck. This has had a most encouraging effect on the miners of the Slocan district, as this is the deepest working in that section when measured from the approved the vein to

made.

"At Ainsworth there is but little development in progress." On the Highlander and Black Diamond, however, one ingressil Sargeant air compressor of four drill capacity has been installed, and is operated by a Felton water wheel, which is run under a head of 1,080 feet. This is the greatest head of water at present in use in the Kootenays.

To return to the Slocan I might mention that the Ruth Mines are enlarging their plant by the addition of a compressor plant, a concentrating mill of a capa-

sor plant, a concentrating mill of a capacity of 120 tons per day and a tramway. The mill and the tramway are almost completed and will be in operation in a

ew weeks." Mr. Sword is of the opinion that the mines of the Slocan, some of which he visited, never looked better, and were it not for the unfortunate dispute between mine owners and the miners, whole country would be in a most pros-perous condition. In his opinion, the sooner the differences are adjusted the better it will be for the whole mining

SOUTH AFRICAN AFFAIRS.

The Reply of the Transvaal to Chamber lain's Proposal Not Yet Received.

Pretoria, Aug. 15.—The reply of the overnment of the South African republic to the proposal of the British secretary of state for the colonies, Mr. Jos nberlain, to refer to a joint commis sion the effect of the franchise reforms upon the status of the Uitlanders, has not yet been sent to Sir Alfred Milner, British High commissioner in South Africa. The various alarming rumors in circulation are, however, without found

In trying to leap from the upper deck of the island ferry steamer Shamrock to Yonge street wharf, Murtle Shea, a 16-year-old Toronto youth was drowned. Dr. Bryce was informed yesterday of a fifth case of anthrax among cattle at Listowel. No further cases are anticipated, as very complete safeguards have been adopted.

BLISTERED BY DOCTORS For Heart Disease Without Help-Dr. Agnew's Cure for the Heart Relieves

Mrs. O. Ward of Magog, Que., was a great sufferer for years from heart disease. Physicians binstered her and gave her other treatments without relief. She read in the papers of the wonderful cures made by Dr. Agnew's Cure for the Heart. She procured a bottle of it. Fifteen minutes after the first dose she had relief. Before taking this remedy she had constant spells of suffocation and fluttering, and severe pains about the heart, and was so weak that the act of sweeping the floor caused her to faint. She continued using the remedy until she had taken six bottles, and today she is as well as ever she was. Sold by Goodeve Bros. Mrs. O. Ward of Magog, Que.
