Analysis of the Water of the Georgian Spring.

I have made a careful quantitative analysis of a quantity of this Water sent me by the Proprietor of the Spring, Captain Kains. It is a Saline Water, containing earthy Chlorids, with portions of Bromids and Iodids, thus resembling the Plantagenet Water, from which it differs chiefly in the presence of a portion of Sulphates, which are not often met with in Waters of this class in the Province. It has a specific gravity of 1008.78, and contains in one pound avoirdupois, the affixed quantities of the following substances:—

Grains.

Chlorid of Salines

Chlorid of Sodium
Chlorid of Potassium
Chlorid of Calcium
Chlorid of Magnesium
Bromid of Magnesium
Iodid of Magnesium
Sulphate of Lime
Carbonate of Lime
Carbonate of Iron
Silica

saddition of Sulphate of Lime, differing however in some respects as to quantity.

I have delayed giving my opinion of the efficacy of the Georgian Water, in order that an opportunity might be afforded me of speaking more confidently of the advantages to be derived from its employment. I have wincased beneficial results from its use, as an aperient, antacid and chiurctie, and also in allaying the distressing gustric terangement attendant upon the early months of pregardeness of the control of the
