he said, "if I am considered merely as a literary man." He comforted himself with the thought that when his numerous books were forgotten he would still be remembered as the contriver of the Canada Company.

Scotchmen Fit In. Scotchmen Fit In.

The Victoria, B.C., Colonist says: In an address before the Morayshire Farmers' Club a short time ago, G. A. Ferguson, farmer, Surradale, near Elgin, Scotland, who was a member of the recent agricultural commission to Canada, related some of his experiences in the Dominion. In his concluding remarks Mr. Ferguson said Canada was a great country, a country of untold possibilities with its rich soil and superb climate. It was the land for the worker and for the man of ambition—above all, it was the land for Scotchmen who found their field too lean and too narrow. Scotchmen seemed to fit into the ways of Canada at once, and thought it a better home even than the one they will can testify to the better home even than the one they had left, Canada could offer everything that the heart of many a hardworking father of a family desired. The strength of home ties compelled many a one to live miserably in the Old Country when by the same energy and application he could, with the better opportunities in Canada, live in comfort and security. With its great

That the Egyptians made sea voyages tong before the time of Solomon, hitherto considered the first ocean traveler on a large scale, is declared by Professor James H. Breasted to be conclusively proved by a tablet found by him in Palermo, Sicily, dur ing the three years' exploring trip from which he recently returned. Professor Breasted asserts that the in-scriptions on the tablet show that the Egyptian king who built the first pyramids made a voyage with forty ships across the Mediterranean to Lebanon to obtain cedar for a tem-ple. This journey, according to the professor, was made in the thirtieth century B. C., or 2,000 years before Solomon made his voyage for a sim

china. The articles come stamped just as do dolles, and the operator has only to use her own judgment in color schemes which are applied along the delicate lines. The oriental markings are pretty, and the colors are lasting, calling for no kiln to complete the work. Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Cure is available.

Fumigating Library Books.

The library subscriber sniffed suspectionally at the copy of "The Three Musketeers" which she was about to take home. "Carbolle acid," she said "Have you been fumigating the

books?"

"No, we haven't," said the librarian "hut some subscriber has. Many of our patrons like to do their own fumi gating. Usually they use carbolic acid.
At times when a good deal of sickness is reported the famigating craze is especially severe and one-third of the books brought into the library smell to heaven with carbolic acid."

Importations Increase.

In forty years importations have increased by no less an amount than \$300,000,000; dutiable goods increased from \$45,250,395 to \$230,917,914, and free goods from \$23,314,102 to \$133,319,850. Once more the increase is most gratifying, as in two years it has been \$54,000,000 in dutiable goods and \$23,000,000 in free goods. Even when we come to show exports from Montreal alone we find an increase last year compared with the year 1907. Not very much, it is true, but still large enough to be noticeable. The record to March 31, 1908, was the second largest for the year in 22 years. Turning to manufactures, although the precise figures are not just now available, it is agreeable to know from reliable sources that the increase during the past year most have been considerable. was available, it is agreeable to know from reliable sources that the increase during the past year most have been considerable.

The Order of Fools.

April 1 is not the only fools' day in the year. On Notember 12, 1381, the Order of Fools was instituted by Adolphus, count of Cleves.

Members were not by any means idiots, however, for the word had a different meaning then. They were the prototype of our modern Order of Foresters or Odd' Fellows, doing a similarly benevolent work. Their insignia consisted of a mantle, upon the left shoulder of which was embroidered a jester, or fool, in cap and bells, yellow hose and silver vest. So these cheery, useful jokers had a bright, happy outlook upon life and met to rether to dispense the earnest of their healthful existence at stated intervals, the chief day of which was Nov. 12.—

you shall hear the beans rattle."

The new tower of the Birminghs University is to be fitted with one the largest clocks in this country, will have four dials, each 17-1-2 fe the largest clocks in this country. It will have four dials, each 17-1-2 feet in diameter, made of cast skelston iron filled in with white pot opal for illumination at night. The hands are made of strong rolled sheet copper, and each pair weigh about 150 pounds. The extreme length of the minute-hand is 10 feet 4 inches, and the hour-hand at the widest part is 2 feet. The clock itself is over 9 feet long, the frame being one solid casting weighing alone about half a ton. It will strike the hours and Westminster chime quarters on five belis, weighing about ten tons, the largest, or hour-bell, weighing five tons. The clock will only require winding once a week, the total weight when installed, including the dials, belis, weights, etc., being quite twenty tens. The makers, Messrs, Joyce & Co., Whitchurch, Shropshire, England have erected hundreds of important clocks in all parts of the world.

"That Reminds Me." "That Reminds Me."

Many and varied are the methods to which busy men have recourse in order to keep their memory "peeled."

A very successful plan is that of a shrewd London man, who has recourse to the use of pepper or snuff to jog his memory. A liberal dose spread over his handkerchief greets his olfactory nerves whenever he extracts it from his pocket, and, as he himself says, then "that reminds me." It is a somewhat uncomfortable plan, but, it must be admitted, it is decidedly effective. There is one old Government clerk in Whitehall who is an amusement to all the juniors. When he has any matter of urgent importance to attend to in the morning he invariably ties two of his fingers together with a small piece of red tape.

Bluestockings.

Boswell in his "Life of Dr. Johnson" states that in his day there were pertain meetings held by ladies to afford them opportunity of holding converse with eminent literary men. The most distinguished talker of these gatherings was a Mr. Stillingfleet, whe always were blue stockings. When away his absence was so telt that the remark became common, "We can to nothing without the blue stockings"; hence the meetings at which he figured began to be called "bluestocking clubs" and those who frequented them bluestockings.

Bakers in Germany are fond of making odd experiments, the following being reported from Duisburg, in Westphalia. At a children's party recently held in that town there was exhibited and afterward cut up and distributed among the youngsters present a break twist which for size at least has surely rarely been equaled. Weighing no less than 180 pounds, it had a breadth of 1.70 meters and a length of 3.20 meters and was thus found sufficient to supply a satisfactory afternoon collation to as many as 500 boys and girls.—Bakers' Weekly.
