TALKS WITH WOMEN. Madame Qui Vive's Advice to Her

There is nothing in the world much

more interesting than a clever, bright, wholly alive woman of keen wit and charming manners. There is nothing on earth so tire-

some and so wearying as the woman who affects vivacity, chews her fingers in ecquettish playfulness, giggles, giggles, giggles and says nothing but talks always.

Were I a man and married to one of these—but I will not reveal what I should do says Myss. On Viva to

of these—but I will not reveal what I should do, says Mme. Qui Vive, in the Record-Herald.

I should do, says Mme. Qui Vive, in the Record-Herald.
Anyone can appreciate a woman of strong personality and plenty of natural animation. The whole world likes the woman who is well poised, who is equal to emergencies, who thinks before she speaks and who is capable of passing Judgment without fault other than these human mistakes that are so natural for the best of us. Often a woman of this type is crisp in her speech and brimful of pleasant, harmless repartee. It is a pleasure to know such a woman, for a friend. Everyone who meets her feels intuitively the inspiration of her companionship. She is delightful to talk with, "darling" to walk with, and the best kind of a friend to know. No matter how effervescing her talk, it is never cruel, harsh or unkind, It is simply the charming chatter of a clever and balanced woman. She will talk at great length about your troubles, but you'll never hear a mention of her own. Her view of She will talk at great length about your troubles, but you'll never hear a mention of her own. Her view of life is broad and convincing—yet she is neither dull company nor a severe critic. She is as refreshing as an early morning in the woods, when the grass blades sparkle with dewdiamond settings and the world is awakening to a glorious day. She is never uninteresting. To her stupidity and kittenishness are an equal bore. She is vivacious, but the vivacity is always wholesome and rational.

She is vivacious, but the vivacalways wholesome and rational. But that other type of woman, the teresting is to be a simpering, tit-tering silly! She tattles her point-less nonsense just because she must ever needs be tattling. And, half an hour afterwards she stops to think. There is nothing quite so demoralizing as this ungovernable habit of talking to-day and thinking to-morrovy. It is a frailty that is largely monopolized by the dear sis-terhood, and it is an error of con-

terhood, and it is an error of conduct from which they should separate themselves.

To be bright is not necessarily to talk all the time. Most women talk too much, anyway. To be bright is to keep still until you have something to say, that is worth saying. Keen repartee at the expense of some other individual is always in bad taste. Harmless fun and simple nonsense are what keeps the world wagging in its fine old way. Be serious in serious affairs, but keep "Marriare, I've tried and tried to get you to hold your infernal tongue, but you don't seem to catch the idea that it's no use talking about things you can't prevent."

Then, Hiram, why don't you shut the Harold's head is a great deal like his father s?

wagging in its line old way. Be serious in serious affairs, but keep your heart light with a little healthy frivolity—the kind that is as pleasant to others as it is soul-cheering to one's self.

Have you ever met a woman who let you do the talking, and who opened her mouth only when she had something mighty entertaining to something mighty entertaining to say? She's the kind of a woman that makes you want to throw your pomponned sailor toward the azure heavens, and to shout for joy. There, say you, is a woman who is properly balanced. Take a little mental negative of her and hang it in your. heart. It will ever be a helpful inspiration toward acquiring that ex-cellent combination—dignity and mental sparkle. The trouble is that few women know just where to draw the line in their spasms of mental vivacity. It isn't so much what you say, either, as how you say it. What may sound extremely charming from one woman may be fearfully common

from another Let me tell you a little secret. Every night when you say your prayers, add this little line:

"Dear God, help me to cultivate the soul of a gentlewoman." Then all these things will straighten themselves out. Have the manners, the speech, the soft voice and the ladylike poise of a gentlewoman. You are equipped then for a life that is properly ballasted.

PINK LINGERIE. Wonders of the Trousseau of a French Princess

One of the innumerable French princesses has created something of a sensation in that fashionable set in Paris known as the royalists by trousseauing herself with a complete set of pink lingerie, says the St. Louis Globe-Democrat.

In this noble bridal outfit there are sets in pink silk, sets in pink dimity, in pink silk, sets in pink dimity, in pink silk, sets in pink mainsook and in a fine pink muslin.

The shades chosen are old rose, pastel, pink, peach color, old pink blush rose.

Each set consists of six pieces, which include two petticoats, one the little underskirt called a "modesty petticoat"; a corset cover makes a third, a chemise the fourth, a nightgown the fifth.

Pink corsets of silk, of satin, coutille, of ribbon, of straps of silk braid and lace and little "corsettles" of lace, with ribbon along the top and along the lower edge, for wear with an empire waist, are found in the outfit.

The fad for pink prevails on the continent. Russian pink is the latest retaries of committees, etc., the same shade. It is a ripe pink, resembling watermelon pink, and is the popular color in St. Petersburg this season, that Northern city of fashionable women. The Viennese women, too, those wonderfully beautiful women who outchic the French in point of chicness, are wearing pink, and the color rages in Paris and London.

A pink natnsook nightgown was cut with pointed neek front and back. The neck was finished with white lace help with less there was not lace. Below the lace there was a ruf-fle of the pink, and then came a chou of pink ribbon, one at each side of the point in the neck, and each finished with streamers of ribbon.

St. Patrice, Lothienere, Que, Sept. 30.—(Special)—A sad story of unjust imprisonment is that told by Philippe Boissonneault, of this place. His case was worse than that of the ordinary prisoner, for his bonds were those of pain and disease. For eleven years they held him, a hopeless victim, chained, tortured, a slave to Kidney Disease.

Who is there in the world that thinks man was intended to suffer, that he merits his fate, that he deserves the afflictions of disease put on him? Surely no one thinks that. We were put here to be happy, to be healthy and free from pain. Nobody will say that Phillippe Boissonneault, or St. Patrice, deserved his long pulishment, and nobody but will rejore to learn that through the aid ca a wonderful medicine—Dodd's Kidney Pills—he has escaped.

Dodd's Kidney Pills, the remedy that proved such a boon, have made a reputation all over the world in the curing of diseases of and arising from the Kidneys. Bright's Disease, Diabetes, Rheumatiam. Lumbago, Backache, Bladder and Urinary Troubles! I decided to try them and sent for six boxes, though without confidence, but tookly I am completely cured and thank Dodd's Kidney Pills alone for it."

PAIN IN HIS LOST ARM.

For Fourteen Years a Minnesota Man

Has Endured It. Nels P. Nelson, the jolly assistant custodian of the Federal Building, whose face always wears a smile, is not happy, says the Minneapolis Journal. His countenance belies him. Nels cannot find his arm. For fourteen years he has sought the missing member without avail. Mr. Nelson was employed in a planing mill when his troubles began. He had not become a politician and a diplomat. One day his arm was drawn into a machine, which crushed his elbow. Dr. Ames was called, and an amputation was performed.

Mr. Nelson was soon troubled with a pain in the part of the arm that was missing. He consulted the assisting surgeon, laid before him his idea that if the absent limb could be located he would find relief. The doctor convinced him that it was all newspaper talk, but didn't reveal the location of the member. Later the patient had a feeling that his arm was bound to his side as if in a sling. For the long fourteen years he has endured this pain, which he believes might be stopped if he could find the lost member. Mr. Nelson was soon troubled with

The sensation of pain in an amputated member is by no means rare, as it frequently takes time for the nerves and brain to adjust themselves to abbreviated conditions. Nelson's case is somewhat unusual, however, from the fact that he has had the uncomfortable sensation for fourteen years. He has lately heard of a railroad man similarly afflicted, who was relieved by supplementary operation on the nerves of the stump, and is inclined to believe that similar treatment may be effective in The sensation of pain in an ampular treatment may be effective in

Ontario Beats All America at Buffalo.

Ontario cheese has triumphed at the Pan-American, where it was in competition with the whole North and South America, and won the gold medal offered by the Exposition. The victory is notable and is one more tribute to our dairymen and to the officials who selected the exhibit. The Department of Agriculture of Ontario through a committee of the Western Dairymen's Association sent over at different times during June, July and August 140 boxes of cheese which were scored by expert judges. The exhibits were the product of 57 cheese factories of Ontario, situate in both the east and west, and included a fine lot from the Ontario Agricultural College Association to cluded a fine lot from the Ontario Agricultural College. According to the rules of the Exposition, any exhibit scoring 94 points or over would receive a diploma and of the Ontario August cheese, which was last scored, only one package failed to reach this standard, while some of the packages scored as high as 99% ner cent.

of the packages scored as high as 99½ per cent.

Provision was also made in the rules and regulations that "an award will be made to the State, country or Province having the greatest aggregate score on its individual exhibits of dairy products, and an award made to the exhibitor receiving from the judge the greatest aggregate score on his exhibits from each such State, country or Province."

The award decided upon by the Board of Jurors was a gold medal.

The award decided upon by the Board of Jurors was a gold medal, and at the meeting held last week this gold medal was awarded to the Province of Ontarlo. Only one gold medal was awarded, and the cheese makers of the Province are to be congratulated on having se-cured this high honor.
