

Not Wealth But Welfare.

While it is said that the coal strike has been settled, it is necessary to remember that a majority of the coal miners were in favor of a strike and only the lack of a two-thirds vote prevented the precipitation of one of the greatest industrial struggles the world has ever seen, the end-of which no one could foretell. The idea of the nationalization of the coal mines has taken strong hold of the imagination of the miners, and it is to be feared that it is not the benefit of the country that they have in view, so much as expected improvement in their own positions. It is the greatest error that the labor man who has not studied the matter suffers from to think that because a few men are very rich from private ownership, therefore the dis-

an expected improvement in their own positions. It is the greatest error that the labor man who has not studied the matter suffers from to think that the labor man who has not studied the matter suffers from to think that is troution of this wealth would make everyone well-to-do.
A rich man should be judged by the use he makes of his wealth, that is, by his distribution of it, and not merely by the amount of it. Rockefeller who could buy him out if he were willing to sell. They say he has \$100,000,000.
But even if he had \$500,000,000 this would be less than \$5 a head of the dissipated to-morrow. Definite objects can be accomplished by a wealthy. It may be objected that not all wealthy men are public-spirited, but the apulation of this objection to poor men is equally valid.
Poor men without public spirit are just as injurious to a nation as rich mess, less disregard for the common welfare, more willing to the detted to the family, every member of which is entitled to the family, but that is usually the fault of the family or the nation as a great family. There may be naughty children in the family, but that is usually the fault of the family or the nation a maturest in the world to cap, and why we need a new principle upon which is build our reconstructed society. To build on the old foundation with the world to cap, and why we need a new principle upon which is sit of your of us is to get for his work, but for what we can contribute to the whole matorial is merely to forepeat our old mistakes and solidify them in a for us is to get for his work, but for what we can contribute to the whole matorial stock. Then, indeed, we shall be justified in asking for a fare share and posses.

Maintaining High Wages. - MAGTINE !!!!

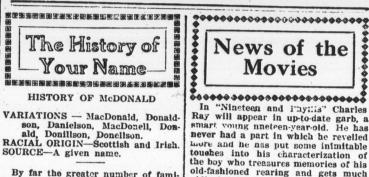

No employer of labor has gone on record anywhere as advocating re-duction of wages, either now or in the future. The arguments for higher wages in the past few years have been conclusive. The wages were granted, and the general sense is that they must be maintained. There is one con-dition, however, and it does not seem unreasonable. The wages were ad-vanced in war time, when production was speeded up by the workers with a life-and-death consciousness of its importance. The importance is not less at present, and the stabilizing of wages at a great advance on pre-war rates in lieu of the piece-work terms of the war years requires a proportionate return in production. The proprietor of a small factory had occasion to leave his home for some time and left the factory to run itself. When he returned he found that the workers had taken their own convenience about their found that the workers had taken their own convenience about their he found that the workers had taken their own convenience about their work, and when he figured out the net result and found the place had been run in a hole, he closed it up and locked the door. The workers gathered and interviewed him and he explained the position and the accounts. They had not produced enough material, he showed them, to pay their own wages, not to speak of what might have been expected as a return on the invest-said he would reopen the factory on condition that they would produce ac-cording to their ability. They agreed, with the result of turning out from fifty to a hundred per cent, over their slack record. Millions of people are reform wages cannot be maintained and commodities cannot be cheap. It is difficult, however, as long as the political economists preach the law of retorm wages cannot be maintained and commodities cannot be cheap. It is difficult, however, as long as the political economists preach the law of supply and demand, to get the workers to adopt a practice that directly contradicts that fallacy. The demand for everything is practically unlimited. The supply should equal it. The real problem is distribution, and the political economists by failing to consider it have created the cults of communism and Bolshevism.

Home Rule Operates in India.

This month the great experiment of Home Rule for India has its be-This month the great experiment of Home Rule for Indra has its be-ginning. It is true that it is but a slight measure of antonomy that has been granted in comparison with the wide authority possessed by Canada, but it is admittedly an experiment among a people utterly untried in self-govern-ment and inclined by their past history to depend upon paternal attention. Under the new regime this will not be withdrawn and at the same time much encouragement will be given to the new electorate to achieve further liberty and to train their unenfranchised friends in he pronared to take up Buder the new regime this will not be withdrawn and at the same time much encouragement will be given to the new electorate to achieve further liberty and to train their unenfranchised friends to be prepared to take up these important duties of citizenship. The national consciousness of India has been awakened in a remarkable way, just as we have been told the national consciousness of China has been awakened. But this is the more remarkable in India, inasmuch as the religious differences of the people are very great. In China people are said to have three religions, but it would be equally true to say of a British scholar that he had three religions if he way may be a Budhist, a Confucian and follow Lao Tze, and find no contra-diction in his religions, pluto, sophical and devotional ideas. But in India it is different. The Hindu, Brahman and the Mohammedan are as the poles hands in the National movement in India. There is unfortunately a dis-sentient sentiment, dissatisfied with the scope of the Home Rule measure, not to mention Sinn Fein and Bolshevist influences. These are led by Yandlie, a man of great power of character and wide influence, who is at the intely deadly in its effect upon the now thich is perfectly peaceful, but abso-intely deadly in its effect upon twich a park time to be releaded to the same to the base the same to the same to be a budhist the base of the sentence. The sentence is a the poles hands in the National movement in India. There is unfortunately a dis-sentient sentiment, dissatisfied with the scope of the Home Rule measure, not to mention Sinn Fein and Bolshevist influences. These are led by Yandlie, a man of great power of character and wide influence, who is at the intely deadly in its effect upon the new is perfectly peaceful, but abso-Yandlie, a man of great power of character and wide influence, who is at the head of a political boycott movement which is perfectly peaceful, but absolutely deadly in its effect upon the new legislation. The objection is to the limited franchise only 5,000,000 out of 300,000,00, or one in sixty, having a vote. It is believed, however, that the Home Rule scheme will receive a trial and that under the law-abiding tendencies of the people it will prove a success and be extremely widened in its scope before much time has passed.

DEMPSEY AND CARPENTIER SIGN THE PAPERS

They've really done it—they've signed the papers, those fatal papers—fatal to one of the two, but we can only stand by until next March and do our prophesying, as the contract reads that the bout in which Dempsey will defend his title, shall take place in the United States, Canada or Cuba between next March and July Fourth, the champion to get \$300,000 and Carpentier \$200,000. Dempsey he certainly giving "Carp" the "once over" as he is affixing his John Hancock.

lies bearing this name are of Scottish descent, though originally it would be hard to tell whether the Clan Donald, through which it comes down to us for the most part, would have been more properly classified at that time as Scottish or Irish.

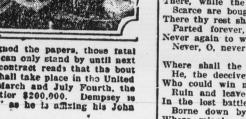

Geographically—that is to say, ac-cording to modern boundaries—it would be Scottish. But racially—considered from the angle of the twelfth and thirteenth centuries--it was just s much Irish. The MacDonakds, or the Clan Don-

The MacDonakds, or the Cian Don-ald, were the rulers of the Western Isles, which they had wrested back from the Norwegians, and at later periods their power was so great as to rival that of the kings of Scotland, Originally of course they Goels had Originally, of course, these Gaels had crossed over to the Isles and the Scot-

eish mainland from Ireltnd. The clan name, "MacDomhnaill," The clan name, "MacDomhnaill," omes from the given name of "Domhnall," compound of two Gaelic words "domhan" and "all," signifying "mighty world." Domhnall, or Donald, was a grandson of the chieftain who conquered the Norwegians. One branch of this clan crossed back to Antrim, Ireland, but the others remained in the Isles and in Scotland

In the istes and in Scotland. The name Donaldson, in its various spellings, is, of course, merely the English equivalent for "MacDom-hnaill." Danielson is a corrupt form, for the given names of Donald and Daniel, while they sound somewhat allke, are not at all the same. The forms of the pame in which the fail forms of the name in which the "d" appears are Scottish, leaving the Irish

Movies In "Nineteen and Fayilis" Charles Ray will appear in up-to-date garb, a smart young nneteen-year-old. He has never had a part in which he revelled wore and he has put some inimitable touches into his characterization the bay who treasures memories of his old-fashioned rearing and gets much ridiculed for it. The only "villain" in the picture is a burglar, and he has a sense of humor.

Tom Santschi, who is in the Sierra Nevada Mountains finishing the Sierra Nevada Mountains finishing the sixth of a series of westerns, has the honor of having served for the longest period with a single producer, it is said. He was with Selig for ten years from the time that producer is the second seco was with Selig for ten years from the time that producer was **Wa**king "The Spollers" and other Rex Beach stories. His nearest rival is probably Harry Morey, who was with Vitagraph near-ly a decade. Santschi is now with Pathe.

Annette Kellerman has again shift ed from the picture studio to the vaudeville stage and is now on tour

Killing a real tiger for a photoplay scene, will be the unusual stant done for Frank Mayo's pcture, entitled "Tiger." Princess, the feline victim from the Universal menagerie has become too savage to live and must die anyway.

Mildred Davis, Harold Lloyd's pe letter from a little admirer in Cork, Ireland. The girl wrote: "I love you Ireland. The girl wrote: "I love you very much, so I ain sending you a half dozen handkerchiefs which I bemstitched and embroidered with your initials just for you. I know they are not much to send to such a fine lady." Mildred hastened to assure her Irish friend that such beautiful linen has become rare in this country.

New stars recently put forward are James Kirkwood, by Alian Dwan, and Alice Calhoun, by Vitagraph. Another company now forming is to star Marguerite Fisher

Where shall the lover rest, Whom the fates sever From his true maiden's breast, Parted forever? Where through groves deep and high, Sounds the far billow, Where early violets die, Under the willow.

中国語言 There, through the summer day, Cool streams are laving; There, while the tempests sway, Scarce are boughs waving. There thy rest shalt thou take, Parted forever, Never again to wake Never again to wake. -----

Where shall the traitor rest, He, the deceiver, Who could win maiden's breast, Ruin and leave her? Kuin and leave her: In the lost battle, Borne down by the flying, Where mingles war's rattle With groans of the dying.

Her wing shall the eagle flap, O'er the false hearted. His warm blood the wolf shall lay 'Ere life be parted. Shame and dishonor sit By his grave forever; Blessing shall hallow it-Never, O, never! -Sir Walter Scott.

SILO IS GREAT SAVER OF CROP

Every Year More Farmers Are Realizing the Benefit.

The season that has just passed has had the effect of clinching in many quarters the argument in favor of silos. In localities where the growth was delayed by the unseasonable weather at the beginning of the summer, the harvesting was correspond ingly late, and many farmers were caught by the unusual rains in September, which have made it impossible to adequately harvest the grain In some sections it is still to be seen in the fields, blackened and runed. This loss could, to a great extent, have been saved if the farm had possessed a silo or even more than one in which the comp product could have been stored tand converted into the very est of winter feed.

Without doubt the silo is the one building that the farmer cannot do without, and every year an increasing without, and every year an increasing number of practical men are coming to recognize this. The Government has been doing all in its power to bring this before agriculturists every-where, and in some sections arrange-ments have been made for a consid-crable reduction in price of the neces-sary materials. Furthermore, in each district the first silo will be erected, it desired, under the direct supervision desired, under the direct supervision of a Government expert, and the neighboring farmers can in this way neighboring infiners can in this way get the benefit of his advice for the small trouble of visiting the place during the erection of the silo. Last year an frish baronet, who had also distinguished himself during the war, while visiting this province was so while visiting this province, was so much impressed with the importance of silos, that, hearing one was to be erected in the vicinity of Victoria, he went out to the farm and, donning the him, had brough with worked steadily for two days on the job in order to became thoroughly ac-quainted with the method of construction so as to be able to direct the erec-tion of similar structures on his farm in Ireland.

POLAND No country has more romantic associations than Poland, no country of the continent is richer in tragedy, no country has suffered more from selfcountry has suffered more from bein-feh and ambitious neighbors. It is almost uniformly lacking in natural procective boundaries. Immediately beyond the northern frontler is the strengly defensive region of the strongly defensive region of the Masurian Lakes the Carpathians are Masurian Lages the Carpathians are some way beyond the present southern border. The average allitude is low and the country divides itself into three distinct areas: the plateoux of the south, the central plains, and the Elitic Ridge in the central plains, and the Baltic Ridge in the north-east. The climate is more temperate than that of the majority of Russia, and more severe of that of central and west European countries. Southern event European countries. Sanitary condi-tions are wretched in most Polish towns, and the provision of doctors and hospitals is hopelessly inadequate. total population of the present Poland 13 about 15,000,000 these about 75 per cent. are Foles. There are in addition a number of There are in addition a number of Jews who speak Yiddish, some Ger-mans and some Lithuanians, who speak their own language. Warsaw, with a population of nearly a million souls, before the war is the biggest town. The era of Russian rule in + Poland lasted from 1915 to 1914. It Poland lasted from 1915 to 1914. It was marked occasionally by sporadic outbreaks and indications of nation-alism, of which the most important occurred in 1830 and in 1863, both of which were put down by Russia with sternly repressive measures. The grant of a constitution to Russia, and the summoning of the first Duma filled the Poles with hopes which were almost immediately disappointed. The prevalent religion of Poland is Roman Catholic, about seventy-five per cent. of the race belonging to that faith. Protestants are mostly Lutherans. The primary schools of the country are supported by the districts in which they are situated, while the secondary schools are under state control. The Vistula River was at one time the Vistula River was at one time the most important means of communica-tion in Poland, but before the war its importance was declining. There are some privately owned and some state owned railways, notably one connect-ing Warsaw with Vienna. By the cutting of a corridor through the north Cutting of a corridor through the north to the sea, and throwing the port of Dangzig open to the Poles under the League of Nations, Roland now has an outlet to the sea. Rye is her chief crop with cats, wheat, and barley also largely cultivated. Poland is fairly well provided with forests which be-fore the Russian revolution were the fore the Russian revolution were the property of the Crown. Her minerals are neither rich nor varied. Manu-facturers have made rapid progress, especially in the cotton and woollen trades.

CONCRETE SHIPS

In Der Rhein Herr P. Wernecke, of Lauenburg, has an interesting article on the economic value of the concrete ship. He points out that the concrete ship was really a war measure, due to scarcity of steel, of labor and of time. scarcity of steel, of labor and of time. In most countries the yards have clos-od down. In Germany, however, a num-ber of new yards have been opened since the armistice, due no doubt to the conditions resulting from the sur-render of German shipping to the Alrender of German shipping to the Allies and the resultant shortage of tonnage, which has made it desirable to use every means possible for construct-ing new ships. The advantages claim-ed for the concrete hull are the high development of the German cement industry (now indeed lifeless for lack of coal); lower yard and overhead expenses; rapid output; smaller COST maller ard and ship absence of bottom fouling; more in-tensive operation; fewer repairs and longer life. The disadvantages are greater weight; lesser deadweight; lesser manoeuvring ability; larger en-gine power and fuel consumption and its high cost of forms and moulds, un-less series of ships are built. Herr Wernecke does not find the concrete ship suitable for sea or occan work, and devotes himself, therefore, to economic worth on rivers and nland waterways. The principal requirement absence of bottom fouling; more in waterways. The principal requirement in river ships is high deadweight capacity with low draught.

Wilson's Posthumous Potentialities.

Adhesion to the Democratic ticket of a portion of the Irish and German vote in the United States presidential election has created the impression that the coming Republican administration will be less anti-British than a Cox administration would have been. That remains to be seen. A higher protective tariff would not necessarily be pro-British, and the "interests" appear anxious to push the shipping legislation that President Wilson vetoed. But if men of the type of Elihu Root and Herbert Hoover are included in the Harding cabinet we may be assured of something better than favor, and intat is fair-minded and just dealing, which has all the qualities of Portia's mercy and blesses him that gives and him that takes. The Republican party has recognized also that the Irish question is no more a matter for Washmercy and blesses him that gives and him that takes. The Republican party has recognized also that the Irish question is no more a matter for Wash-ington's consideration than Haiti is for London's. It will be the duty of President Harding, if President Wilson does not forestall him, to negotiate peace with Germany, unless the United States actually does want to create a record of having been longer in a state of war with Germany than the Allies. President Wilson has been rejected as Sw could have anticipated four years ago, and apparently because he was unable to cducate his nation up to his own ideals. He failed to get the popular ear, by failing to talk Americanese. But even among the intelligentsia there had grown up a deep-rooted distrust in him and his methods. His idealism will save his reputation for later times, and while he may have a period of abscurity like Cleveland, he may also like that burly maker of phrases, achieve the solid admiration of posterity.

HREE'S NEW WAY TO" GET SERVANTS

Paris Man Promises to Marry Successful Applicant.

Housewives in Paris, in search of help, which is as costly and as elusive here as anywhere else, are interested but not encouraged by the experience of an ingenious client of an employmont agency in Rue Rochechouart who was overrun with respondents at the frat call, all of them ready to promise to stay permanently. Such luck can-not be expected by the average de-opairing servant-hunter because in this case, the applicant for a maid was a fman, in whose behalf the agency plac-ed the following card in its window: "A single gentleman with a small fortune, living in Passy wighce to

(so far in small letters and the fol lowing in capitals); will marry her On the morning after, the card was

posted the agency received a telephone message from the client asking that it be removed at once, as a troop of we men were besieging his doors, th Then were besieging his doors, the agency having given all of them his address. He said he felt sure he could select from among them one to suit him, but he had a full day's job be-fore him to sort out the ages and sizes and reduce the number of applicants so that he could make an intelligent choice. th

WAYS TO FRESHEN VELVET

Velvet gets defaced by having the pile or nap crushed. It can often be raised again by careful steaming. Lay a wet cloth over the back of the velvet. lift the two together and pass them over an inverted hot iron, holding the wet cloth next the iron, or hold the velvet stretched over the steam spreader on the spout of a tea kettle with the back of the velvet toward the steam

Dust may be removed from velvet fortune, living in Passy, wishes to by brushing, then sponging carefully engage a girl for general housework and steaming.

ncement of the form ing in the Midlands of the Atlanta Company, Ltd., women in England have formally and definitely entered the engineering industry.

The Hon. Lady Parsons, wife of the inventor of the steam turbine of that name, is chairman of the new com-pany, the directors of which include engineers of both sexes. The mana-ger of the plant is a thoroughly educated girl who served a three years' apprenticeship in a machine show dur-ing the war, and the secretary of the company, another clever woman tech nical supervisor i na factory through out the conflict.

"The new firm does not anticipate any difficulty in geeting contracts," said Miss Caroline Haslett, secretary of the Women's Engineering Society. "The firm has already received a sub-contract for machining the parts of a newly invented pump which the French Government has ordered for clearing the water from inundated parts of the devastated area.

"The factory is situated near an en-gineering college, so the girl workers will be able to continue their technical studies in the evening. They will work the standard forty-seven-hour week and be paid the regular trade union scale of wages.

"The directors hope to introduce a co-partnership system. Each of the original employees will become a shareholder and subsequent workers will be given the first opportunity of buying subsequent issues of stock.

"There are at least a hundred qualified women engineers who have served their apprenticeship at a factory in Scotland, where a certain num ber of women are employed in skilled engineering work. A large number of others have had three or four years' experience, in munition factories which make them almost equally skilled.

"So many of these girls are anxious to continue their engineering work that it was decided to organize a company controlled by women."

STUDY OF NORTHERN ART

Anders Zorn, probably the greatest, of Swedish painters, has given 160,000 kroker to the University of Stockholm for the establishment of a professer-ship in the history of Northern art.

Richard Washburn Chi James B. Christian, one o will very probably be the se to President Harding. Mr. than (above) was secretary to Harding during his camper and Mr. Child is a New York lawy of and writer. Both have been meared as probable choice

WHEN SAPPHIRES BLUSH The existence of the electric tim-nace makes it possible to create veri-table diamonds, and to fuse chippings and fragments of ruby into one com-plete t jewel. Now arrives a report that with the aid of radium succe-stul transformations have been made in transformations have been made in

transformations have been made in the appearance, if not in the nature of certain precious stones. A sapphire, it is said, has been turned into a glorious ruby by long exposure to the effect of radium. Chemically, consider effect of radium. Chemically consid-ered, this is not very surprising, for the two stones are both examples of corundum, and the mysterious accident of color is the principle difference between them.

The Beauty Doctor Tells Girls How to Look Prettier.

Do not eat many green vegetables if you suffer from pimples. Some people are under the delusion that the more green food they eat the better the skin will look. This does not al-

the skin will look. This does not al-ways follow, as vegetables are not easily digested. Indigestion never im-proves the appearance of the skin. Some girls are surprised that they are so troubled with spots on the face -"because they live so plainly." The probability is that they live "too plainly." by which I mean that they do plainly is for poor blood, and this latter often manifests itself in spots and pimples on the skin.

A good, safe and simple cutwer, plication for spottiness is 6 reass dusting with fine boracic powder tained from a reliable chemis. Do not drink strong tea ... cu

f you would keep your skin The more milk you take with them the better

Sitting much over the fire is not

Sitting much over the fire is not good for the complexion. For a greasy skin wash with hot water and soap before bedtime, and twice a week bathe the face with a pint of hit water to which about twelve drops of tincture of benzion have been added into b int water to which about twelve irops of tincture of benzion have been dded. Remember that the continued use of a corp owders tends to produce enlarg. A porce because of the continued use of a hand reared calf is sold before it

face powders tends to produce enlarg-ed pores because they clog the pores (which are the mouths of tiny skin glands), and lead these glands to over-secretion in the effort to get rid

of the clogging. When powder, cream or any color-ing matter is used on the face it should always be washed off with hot water before going to bed. The wearing of thin tight walking shoes in winter is a distinct cause of red noses, red hands and chilblains. If you value the brightness of your eves observe this rule: Get as much

THE CALF

If calves drink too much or are al-lowed to drink too quickly, their di-geative organs are upset and they de-velop potbellies, a state to be avoided. Some ingenious inventions in the shape of india rubber teats attached to tubing to draw up the gried or antik from the bucket can be purchased. These are about the nearest approach to nature we can get, and do away with the tendency to potbelly, as the calf must drink slowly. But these things, good as they are, cost money, and need thorough cleaning each time they are used, which takes up time.

and need thorough cleaning each time they are used, which takes up time. As the days become mildler the calves may run out together for a few hours, gradually prolonging the time until they stay out altogether. Some rear-ers do not believe in turning out Spring reared calves during their first Summer. To get satisfactory results Summer. To get satisfactory Summer. To get satisfactory results from calf rearing it is essential to have good material to work upon. Do

is a year old there will be no margin of profit, because it will sell for little more at the market than would a good fat calf. It is, in fact, the carler stage of its existence which costs the money. When the time comes for it to be turned out the little grass that it eats will scarcely be noticed, and it should always be washed off with hot water before going to bed. The wearing of thin tight walking shoes in winter is a distinct cause of red noses, red hands and chilblains. If you value the brightness of your eyes observe this rule: Get as much sleep as you can befors midlight. Do not read when wearing a spotted veil.

worth the money.
