sharp rise in stocks was partly due to covering by a large short account, and some reaction occurred when that artificial element was removed.

Stocks and Bonds

New York, May 5.—The market during the morning developed apparent strength in buying of Northern Pacific, Southern Pacific, Reading, Union Pacific, New York Central and Lead. Traders have contested the rising tendency, assuming that interest will keep prices moving upward until Union Pacific financing has been successfully consummated. There is much optimism in evidence. Bullish interests talk of a favorable crop report on Friday, the Ohio State report showing condition of 92 per cent, against 85 per cent in April. The plate mills of the Steel Corporation reported practically working at full capacity through fresh resumptions. In addition to the improved market for railroad issues, the sales of bonds for April are estimated over 30 millions, and placing of some 23 million New York certificates and some to-day on a 3 1/2 per cent basis, against 6 per cent, for longer term of bonds during the panic, is regarded as further evidence of highly satisfactory conditions in this direction.

Union Pacific should sell ex. the usual dividend toward the end of the month. There is some indication of higher copper metal prices. We favor purchases on fair concessions.—Ennis & Stoppani.

CLEW'S REPORT.
New York, May 4.—The improvement anticipated in these advices for several weeks past has been materialized. In the stock market there has been renewed activity, and on several days sales passed the million share limit, the trend of prices being generally upward.

In spite of the fact that we have already exported about \$15,000,000 of gold, and that Secretary Cortelyou may shortly withdraw \$45,000,000 of Government deposits, money rates have continued very easy, and in this respect no apprehension exists as to the future.

As to general business conditions, the present situation is very unsatisfactory and complex. The wave of depression which began in Wall Street with the panic has entirely left that district, and is now expanding its full force in the various departments of commerce and industry.

In the iron trade depression is extreme; both orders and profits being less than half those of a year ago. While there are signs of weakness in prices, the Steel Corporation still appears to have exerted a strong influence, and orders are much deferred in consequence. It had been hoped that improved conditions in the money market, and renewed ability of the railroads to finance their requirements, would at least lead to the placing of larger orders for steel, but this has not materialized to any extent.

National City Bank shows principal increase in cash in bank statement, and Bank of Commerce largest decrease in loans.

DUN'S REVIEW.
Sentiment was greatly improved in financial circles by the successful issue of new railway bonds, prices of securities attaining the highest position since last October, but mercantile and industrial conditions were not changed. The outlook for the steel business brightened when it was shown that the railroads could borrow money for needed work, and the good progress of the crops promises well for the future in all branches of business.

In so far as current conditions are concerned, however, reports indicate a small volume of trade and only fair collections. Railway gross earnings in three weeks of April were 17.6 per cent. smaller than last year, but reduced expenses will make the net comparison more favorable.

The number of idle freight cars on April 15 had increased to 373,000, most of the change since April 1 being in coal cars. Foreign commerce at this port for the latest week shows a loss of \$2,220,050 in exports and a decrease of \$4,518,460 in imports as compared with the same week of 1907.

Rates for money continued easy despite more exports of gold and the announcement of Treasury withdrawals from the banks of \$45,000,000 by May 23. The
