There are now two modes licensee is personally times in two years of the infraction of the law he shall not be entitled to have his license renewed. A provision of the bill deals with the hours of closing. At present in 46 license divi-sions, the hour of closing is 11 o'clock, in ten 10 o'clock, and in one 9 o'clock. It is proposed that in township muni-cipalities the hour of closing shall be 10 o'clock, not interfering with the Saturday night or Sunday law, and in cities 11 o'clock. There are 816 municicalities in the province. In 706 of them the hour of closing under the bill will be 10 o'clock and in 110 the hour will be 11 o'clock. The sale of liquors to minors is dealt with. In 1884 the act prohibited the sale of liquor to anyone apparently under the age of 16. apparently under the age of 16. In 1890 the age limit was extended to 18 1890 the age limit was extended to 18 years. Now it is proposed to go further and make the age limit 21 years. This, according to a calculation of the Provincial Treasurer, will place more than one-half of the population of the province under total prohibition. Local option bylaws have been adopted in seventeen or eighteen municipalities, but difficulty has been experienced in some cases in enforcing them. In a great many cases no fines are collected. THE BUDGET DEBATE.

Mr. Howland resumed the debate upon the budget. He claimed that \$3,-874,000 of the capital of the province had been dissipated into free air in the easy-going, short-term-tenant manner and L. A. Welch, secretary, a change of government. Mr. Gibson, the venerable member East Huron, twitted the members of the Opposition with endeavoring to prepare ammunition for the next election. The claim that the John Sand-field Macdonald Government had left a cash surplus of over \$4,000,000 was an exaggeration. He compared the ex-penditure of the Macdonald Government with that of the Liberal Government, showing that the higher expenditure of the Mowat Government was

year—and he did not think the result would pay for the powder and shot—with the expense of the Kingston Penitentiary, showing that the Ontario institution was carried on at less ex-pense. He challenged Mr. St. Jehn's pense. He challenged Mr. St. Jehn's criticisms of the Agricultural College at Guelph. The expenditure upon it was \$28,000, which he compared with that of \$34,000 on the Experimental Farm at Ottawa, where they had not a pupil, while the college at Guelph had 250 pupils, not 100, as Mr. St. John had said. tion three licenses shall be granted. Under the old system for the next 400 of population an additional license might be granted. The new proposition is to make that 600 instead of 400. The municipal councils will have power under the bill to still further reduce the number of licenses. There is, however, this limitation, that when a council passes a bylaw reducing the number of licensed places that bylaw must remain in force three years. This is not a new principle, as it is found in the local option law. This feature of the bill touches cities, towns and villages. There are 268 of these municipalities in this Province, and it will be found that a small percentage of this 268 will be affected by the reduced limit.
