Conference. BERLIN, Jan. 17.-A decided opiuion is expressed in diplomatic circles that the recent resolution submitted to the American congress in regard to American representation in the Congo conference is founded on misconception. The American delegates have not engaged in any polemic discussion whatever, but have merely watched American commercial interests. Three prominent reasons are given for the participation of America in the deliberations of the conference: First, because America was the first power to officially recognize the African international association; second, because the population of America comprises six million egroes, whose parent country is Africa third, because Americans have mainly explored the country. There is a fair prospect that the conference will approve Sandford's proposal to build a railway to connect the upper and lower reaches of the
