Note and Comment

A cynic is a man who complains that his wife can always see a blonde hair on his coat faster than the missing buttons that should be replaced.

In last week's tornado in the United States, planks torn from piles of lumber in the town of Desoto, Ill., were carried to Duquin, eighteen miles away.

Not only the robins have arrived, but also the woodpeckers. And after April 1st, Howard Ferguson says there will be lots of swallows.—Fergus News-Record.

"John, you need a shave," the observant wife informed her absent-minded husband. "Yes; that's what my stenographer told me this morning," he replied.

Chicago despatches says a fashionable woman's clothes this summer will weigh only two pounds. When she travels she can carry a purse instead of a trunk.

"Burglars who visited the house . . . ate the two hind legs of a partly cooked turkey."—Le Temps. Considerately leaving the fore legs for the owner.

Finding that his lorry had caught fire a driver at once proceeded to a fire hall and had it extinguished. The fire company would be glad if everybody would deliver their fires in this manner.

Just Wind

To those who talk and talk and talk, This proverb should appeal; "The steam that blows the whistle Will never turn the wheel."

According to a newspaper report, one absent-minded voter at a by-election carefully placed his spectacles in the ballot-box, and walked off with his voting paper. We suppose that he then went to the barber's plined a newspaper around his neck and commenced to read the towel.

Sir Charles Parson's idea of boring a hole ten or twelve miles deep and so securing an inexhaustible source of power from the external heat of the earth was recently considered at the World Power Conference in London. The expense of such an undertaking would be less than that of building a single battleship. Natural steam which is converted into mechanical power is being used in the volcanic regions of Italy from such borings.

To mill our own flour, convert our pulpwood into paper, and in other ways turn our own materials into finished products, is a true All-Canadian policy. It is bad business to sell to the United States that material which would give employment here to many thousands of people.

In digging up ancient Carthage, in Africa, not only temples and statues have been found, but all kind of familiar everyday things quite up to date. Included were tiny bronze mirrors for ladies, razors for men, scissors, and babies' milk bottles, as well as whole cases of surgical instruments thousands of years old.

The third issue of 25-cent paper bills, commonly known as "shin plasters," to appear since the first bills were issued is now being put in to circulation. The new bills are neater and more artistic in design, and show a decided improvement over the old type. They are expected to be in wide circulation in the near future.

The license to be put upon breweries brewing 4.4 beer will be \$5,000 a year. If this is so then many of the smaller brewing plants will be unable to pay the fee and will be forced out of business. The object of the high fee, apparently is to concentrate the manufacture and thus enable the government to exercise greater supervision and more easily force compliance with the law.

Goderich is the seat of an agitation looking for a municipal audit by a chartered accountant. Go to it they may, but if they knew the experience of Collingwood as to the costs there would be some hesitation and some more time elapse before the suggestion was acted upon. Never again for Collingwood if it can be avoided.—Collingwood Bulletin.

A movement to form Canadian drug retailers, wholesalers and manufacturers into a nation-wide association to combat the practice of price-cutting which is said to be ruining the drug business in Canada, is now under way in Montreal and will come to a head shortly with the arrival from England of Sir William Glyn-Jones, well known British pharmacist who is expected to address meetings on the subject in several Canadian centres.

The following interesting question and answer appears in the last issue of the Municipal World: Q—Has a mail carrier any more authority to order which roads shovelled and opened for him than any other person, and is it the pathmasters' duty to see that their beats are in passable condition after a heavy snow storm? A.—No. No roads, no delivery. Service may be withdrawn or courier may deviate from route when roads impassable.

Members of the Canadian Weekly Newspapers Association in every Province have suffered more or less loss from the strenuous efforts of printing solicitors from the big cities to secure printing orders from the small towns. Apparently some of the small town printers are getting busy and soliciting work in the cities. Recently an organization in Toronto passed a resolution deploring the fact that many Toronto concerns were getting their printing done in small towns. Toronto people are great howlers when they have to take their own medicine.

Church union is not a new thing, for very often the young man from the Methodist church waited outside the Presbyterian kirk on Sunday night, and union almost invariably followed.

In this country we sometimes complain of our taxation, but we know little of imposts as compared to the people of the Old Country. A short time ago the Duke of Norfolk died and the inheritance laws of Great Britain cut \$20,000,000 out of the estate, leaving a legacy valued at \$30,000,000, and the heir of the estate has had to rent all the ducal palaces and give up his London home to the Pittsburg iron crowd and go travelling to avoid the expense of entertaining. Should the estate again change hands through death, the government will again fall heir to another forty per cent. of what is left. Taxation over there is a real thing.

RADIO AND FORDS FOR BENIGHTED EUROPE

Thoughtful people on this side of the Atlantic who feel that their own prospects in life the restricted unless Europe gets off to a new start, have suggested that the way to effect the desired regeneration over there is to modernize the continent. They are convinced that if Europeans are left to nurse their grouches there will be another war before long.

The accidental cure is to consist in filling the Polish corridor and other dark hallways so full of Ford cars and radios that the people will forget their troubles and take a new lease on a reformed sort of life in which they will gain a better opinion of their neighbors and forget to sew buttons on to their shoulder straps.

The idea is an excellent one. Europe is pretty seriously benighted. If we could get them to eat white bread, made from Saskatchewan One Northern wheat, salmon from the Fraser river, good Northern spies from the Niagara Peninsula with a few jaunts in the tin Lizzies and a radio seance thrown in occasionally, there would be a fair certainty that the war lords would soon have to hunt a new job. Continental Europeans have been neglected. The children born there are considered only in the light of their adaptability as potential soldiers. The introduction of some modern ideas would work miracles there.

ORIGINAL MELOTTE

Ball Bearings Above Bowl

Bowl is Suspended

THE Melotte bowl is suspended by a spindle from six ball bearings above. It runs continuously without vibration. Friction and resistance is practically eliminated. Machines with bearings below the bowl may get out of balance from wear—the bowl vibrates—the machine turns hard—skimming is imperfect—cream is lost in the skim milk. Examine this original Melotte with the suspended bowl, now. Its use means added profit.

This Farmer Knows Where He Stands

HE has a memorandum on the cheque stub of every account—and an entry in his bank book as well—a double check on his business. The incoming cheques or cash are also shown in his bank book. In a flash he can tell when he paid any particular account or when an account was paid to him. His bank book tells him.

He has no need to go to town to do his business if he is rushed. A cheque by mail pays an item or makes deposits almost as quickly as he could do it himself.

Today the safe, efficient, satisfactory method of business is through the Bank.

ORGANIZED IN GREY

Scores of Thousands of Canada, Great Britain. Now Upheld Standard. First Raised at St. W. Wentworth County, Ontario, February, 1897.

The year 1925 marks Jubilee of the founding of men's Institutes in Western since in 1900 a branch was at Kemble, in Grey County; Jas. Gardner as president; Wm. McGregor as secretary.

Three years prior to the W. I. came into existence and, for that matter, in the British Empire itself. Creek, Wentworth County, 19th, 1897, the first Women's Institute was formed (then called), part of an organization was to reach out to all parts of the world, and Scotland great and beneficent fact life of the rural women of Empire.

The late Mrs. Adelaide of Hamilton, was the pioneer doing much to secure recognition of the education of the women of the province. matters were practically topic for discussion at the in these earlier days, but feminine public spirit was shown by a developing in community problems.

Following Ontario's example other provinces of the Dominion organized; the good work England, where Miss Emily of the institutes of Canada on the honor of organizing auspices of the British Government during the war years, and the men's Institutes flourish in France, Belgium and elsewhere. Of all these the Stoney County is the mother.

The connection of the Women's Institutes with the Provincial ment gives the organization interesting and unusual st Ontario the members have saying that the Hon. J. S. minister of agriculture is the The Women's Institute department of the department of agriculture, indeed a personal interest lends to the work of the W. I. Government activity A. Putman is the superintendent Women's Institutes under the Legislature, and Miss Ethel is his assistant.

The W. I. motto is "For Her Country." As a visitor from
