REVOLVING DRYING KILN.

THE Subscriber begs to inform the Millers,
 Merchants, and the Public generally, that he
 has, at considerable labor and expense, invented
 and completed a Machine for DRYING Wheat,
 Oats, Barley, Indian Corn, or any other Grain
 necessary to be dried before being manufac-
 tured: and he assures them, that it is the cheapest
 and most expeditious mode of Kiln Drying Grain
 now in use. This Machine will dry from thirty to
 sixty bushels of grain per hour in a most perfect
 manner. It is so constructed, that the grain passes
 through the machine, from thence to the rolling
 screen, where it is cooled, in a fit state for man-
 ufacturing. This machine requires very little power
 to keep it in motion, and may be driven by a small
 strap from any wheel in the mill. A quarter of a
 cord of hardwood will produce heat sufficient for
 drying a thousand bushels of grain.

The Subscriber begs to inform the public, that
 he has obtained a Patent for his Machine, which
 extends through the United Province of Canada,
 and that he is prepared to manufacture the above
 Machines to order, or dispose of the right to per-
 sons desirous of manufacturing or using the same.

Any further information on the subject may be
 had, by addressing the Subscriber. All commu-
 nications (post-paid) will be immediately replied
 to.
