It is to be hoped that the readers of the CANADIAN ENTOMOLOGIST, who have the opportunity to add other species to the lists of beetles of the Dominion, will take care to see that the records of their captures are published, as only in this way can faunal papers be made complete. Personally, I should be very glad to see any *Cicindelas* which appear not to come under the species mentioned in this article, whether in duplicate or otherwise. To those who wish to pursue the study further, the following works are recommended as containing nearly all that is known on the *Cicindelidæ* of North America :—

1818. Say, Thos. A monograph of the North American insects of the genus *Cicindela*. Trans. Am. Phil. Soc., N. S., I., 401-426. Reprinted in Leconte's Edition of the Complete Writings of Thos. Say, Vol. II., pp. 415-435, Boston, n. d.

1856. Leconte, John L. Revision of the *Cicindelæ* of the United States. Trans. Am. Phil. Soc., 2nd Ser. XI., pp. 27-62, Pl. I.
