

## GONORRHŒA IN WOMEN.

By Palmer Findley, M.D., Professor of Gynæcology in the College of Medicine in the University of Nebraska, Omaha, Gynæcologist to the Clarkson Memorial Hospital and Wise Memorial Hospital, Fellow of the American Gynæcological Society. St. Louis, Mo.: C. V. Mosby Medical Book and Publishing Co., 1908. Price, \$2.

In this quarto volume of 120 pages we have a very clear statement of knowledge upon the subject of Gonorrhœa in Women. It is a very important subject, and Dr. Findley handles it well. The main features of the book are a discussion on the history of the subject, the etiology of the disease its pathology, its course in women, the diagnosis, its pregnancy, sociology, treatment, and literature upon the disease. Every page of the book is interesting and highly instructive. The chapters on sociology and treatment appeal to one at once as being very valuable and suggestive. It is not until such an array of facts as are brought together in this book is laid before one, does the magnitude of the damage wrought by gonorrhœa in women appear to the fullest to one's mind. The entire subject is handled in an able manner, which gives evidence of careful study. The paper and typography are excellent, and lend much to the pleasure of reading the book. We can recommend this work with much confidence.

PRACTICAL POINTS IN ANESTHESIA.

By Frederick-Emil Neef, B.S., B.L., M.L., M.D., New York. Price, Semi-De Luxe-Cloth 60 cents, post paid. Library. De Luxe Ooze Flexible Leather \$1.50 post paid. Surgery Publishing Co., 92 William St., N.Y., U.S.A.

This very practical monograph presents the author's impressions on the correct use of chloroform, ether, etc., and is a simple and coherent working method, and is of particular value to those general practitioners, who are so situated that the services of a trained anesthetist cannot be secured. Among the subjects covered are: Induction of Anesthesia, Cardiac and Respiratory Collapse, When shall the Patient be Declared Ready for Operation, Maintenance of the Surgical Plane of Anesthesia, Important Reflexes, Vomiting during Anesthesia, Obstructed Breathing, Use of the Breathing Tube, Indications for Stimulation, Influence of Morphine on Narcosis, General Course of Anesthesia, Awakening, Recession of Tongue after Narcosis, Post-Operative Distress, Minor Anesthesia with Ethyl Chloride, Intubation Anesthesia, etc., etc.

This extremely practical and useful little book is condensed to about fifty pages, but every page is replete with valuable data. Printed upon heavy India Tint Special Cheltenham paper with Cheltenham type, with marginal headings in contrasting colored ink.
