twelve months had passed by. A sufficiently liberal rate is allowed, but even in the going past at the rate of twenty a minute, 1,200 an hour, during the entire year, the reviewer at his post would only have seen the sixth part of the infantile host. In other words the babe that had to be carried when the tramp began would be able to walk when but a mere fraction of its comrades had reached the reviewer's post, and when the year's supply of babies was drawing to a close there would be a rear-guard, not of infants; but of romping six-year-old boys and girls.—Medical Counselor.
