

common perception of the major problems and policy issues in the world economy.

Environment

29. Further to our previous commitment to preserve a healthy environment and to pass it on to future generations, we welcome the report by the environment experts on the improvement and harmonization of techniques and practices of environmental measurement. Accordingly, we encourage the United Nations Environment Programme (UNEP) to institute a forum for information exchange and consultation in cooperation with the International Organization for Standardization (ISO) and the International Council of Scientific Union (ICSU), assisted by other interested international organizations and countries, so that continuing progress in this important field can be ensured. The priority environmental problems identified by the environment experts in their report should receive full attention.

30. We underline our own responsibility to encourage efforts to tackle effectively environmental problems of worldwide impact such as stratospheric ozone depletion, climate change, acid rains, endangered species, hazardous substances, air and water pollution, and destruction of tropical forests. We also intend to examine further environmental issues such as stringent environmental standards as an incentive for innovation and for the development of clean, cost-effective and low-resource technology as well as promotion of international trade in low-pollution products, low-polluting industrial plants and other environmental protection technologies.

31. We welcome the important progress achieved since Tokyo, particularly in the International Atomic Energy Agency, in enhancing effective international cooperation, with regard to safety in the management of nuclear energy.

Other issues

32. We welcome the initiative of the Human Frontier Science Programme presented by Japan, which is aimed at promoting, through international cooperation, basic research on biological functions. We are grateful for the informal opportunities our scientists have had to take part in some of the discussions of the feasibility study undertaken by Japan. We note that this study will be continued and we would be pleased to be kept informed about its progress.

33. We welcome the positive contribution made by the Conference of High Level Experts on the future role of education in our society, held in Kyoto in January 1987.

34. We shall continue to review the ethical implications of developments in the life sciences. Following the Conferences sponsored by Summit governments - by Japan in 1984, by France in 1985, by the Federal Republic of Germany in 1986 and by Canada in 1987 - we welcome the Italian government's offer to host the next bioethics Conference in Italy in April, 1988.
