

It allows access only to the controlled areas of a specific facility (LBP or 111 Sussex etc.) Pink pass holders are subject to the following conditions:

- your access is restricted to a period not exceeding six (6) months;
- you have no access to classified information, although you can access Protected A material;
- you must at all times be supervised by a security-cleared employee;
- you cannot escort others into the controlled areas.

The Pink Building Access Card is provided by SPAS following the authorization of a Reliability Status by ISCT.

Maroon Pass

Issued on a reciprocal basis to certain other specific countries. This pass has the same access levels and conditions as the Green Pass. Should you require further information on this contact SPAS.

Blue/Green Contractor "C" Passes (with photo)

Issued to services provider contractors who repeatedly respond to DFAIT - HQ for the purpose of servicing equipment and systems within. Such persons are security cleared. Passes are similar in appearance to a departmental employee pass except the company name appears above a large "C" to the left of the bearers photograph. The card colour depicts the access privileges of the bearing.

Temporary Yellow "C" Pass

Issued to security cleared contractors who are carrying out work within DFAIT - HQ during a very limited time frame. The brief period of stay does not justify the issuance of a Contractor "C" Pass with photograph.

NB - With respect to the other DFAIT offices within the NCA, the presence of Contractor "C" Passes with photo is probable as often a service provider responds to specific client needs regardless of venue.

Where a difference may be noted is in the appearance of the *Temporary Contractor Pass* issued by the responsible building management/assigned guard force. Clarification may be requested by contacting the building management of the respective site.

Please keep in mind that it is your responsibility to ensure that anyone entering one of the towers behind you is authorized to do so.

Protect the security of our department and the safety of the workplace by challenging any person without a pass who may be coming in when you use your card to enter, or when you exit the doors to any of the towers. SPAS (992-5452) should be called immediately if you encounter any problems.
