TAKE MOTOR BOAT TRIP FOR BUSINESS AND FUN

Controllers Investigate Police Patrol Launch Problem at Close Range—Given Fast Ride.

For the purpose of studying the patrol boat problem at close range, some of the members of the board of control invited wives and friends on a motor boat cruise around the bay and island lagoons on Monday as guests of the Schofield & Holden Machine Company.

A rough sea and a couple of companion craft to torment by making them look like plugged 30-cent pieces. She dug her nose in like an elder duck and threw the spray high into the air as she plowed thru the water like a sportive whale. Her 20-mile-an-hour clip made the distance from Yonge street wharf to Hanlan's a mere matter of about three gasps on the part of her drenched passengers. Her sharp prow against the Marcell's of a choppy sea curled the water into two continuous high furores and completely enveloped her in her own spray. Bathing suits would have served her passengers to a better advantage than oilies and sun-vestments.

A Wonderful Midget is Man

SURELY the cyclopes, mythological patrons of the ancient smiths, displayed no greater evidence of their favor and power than is shown by their successors to the aerial blacksmiths known as steel frame construction men of the present day. A word from a midget perched away up on the sky line, a whistle, a wave of the hand—and a huge black girder of rolled and riveted steel weighing 12,000 pounds raises from its bed on the solid ground and sails majestically upward to be placed presently in position 100 and some odd feet above the earth.

No task seems too great or too perilous for these midgets of steel construction. No weight too heavy. No position too awkward to be reached by their long derrick arms. They tread the airy five inch pathways with the nonchalance of men who walk in dangerous ways know but fear not. They swing aloft on ropes, they shout hoarse orders to engines, derricks, air compressors and a multitude of other titans and are obeyed. A wonderful midget is man.

Men, Be Strong.

Take This Belt for What it is Worth. Wear it Until You Are Cured—Then Pay Me My Price.

Every man should understand that physical power, large muscles, strength and endurance come from animal electricity. Treatment will pump every part of the body full of that, and perfection will result.

GET SOME LIFE INTO YOU

Where there is any physical constitution to work on, my treatment will develop perfect manhood. It will take the slightest spark of manly vigor and fan it into a flame which will encompass the whole structure and charge every nerve and muscle in the body with the vigor of youth.

Ellesmere, Ont., March 20, 1908. Dr. McLaughlin—Dear Sir—I am pleased to be able to report to you that the Belt I purchased from you last December has done me a world of good. It has taken the pain completely out of my back, and I can now work all day without feeling it at all. Yours very truly, G. LLOYD.

MR. C. W. TINDALL, 188 Humboldt avenue, Toronto Junction, says my Belt cured him of a bad case of Nervous Weakness.

Dear Sir—I am pleased with your treatment. I feel like a new man. I have gained over twenty pounds. I would not be without it for any money.—DAVID CRAWFORD, Oso Station, Ont.

Wherever you are, I think I can give you the name of a man in your town that I have cured. Just send me your address and let me try. This is my twenty-fourth year in the business of pumping new vim into worn-out humanity, and I've got cures in nearly every town on the map. All I ask is that you secure me and pay me only when your cure is complete.
