

nearly always for 320 acres. This amendment should provide for that amount.

J. A. Macdonald said that there should also be considered the case of persons who applied for timber lands. He did not see that persons who applied in good faith for timber should not receive this consideration. In view of the fact that this should be considered, and that he intended to move an amendment in regard to pre-emptions he thought that the committee might rise and report progress.

Hon. Mr. Green did not wish to allow the bill to stand over. He thought this could come in on report.

In reply to Mr. Macdonald, Hon. Mr. Green said he would allow this to come up.

Mr. Paterson said he wished to know if these settlers needed protection who had been in the province for some time. He was seeking only to protect the working men and the small farmers.

Mr. Paterson said that the House was sick of this play of the member for Nanaimo of appearing for the working men. Mr. Paterson said that he would again ask Mr. Hawthorthwaite if he had not canvassed the members of the House in support of an amendment in the favor of the greatest capitalist in the province and who was blackguarded most by him.

Mr. Hawthorthwaite said he did not propose to protect the timber men. He was seeking only to protect the working men and the small farmers.

Revised Statutes passed its second reading on motion of Hon. R. G. Tatlow.

Out of Order. At the request of Dr. Young the Speaker gave his decision on the point of order raised on Saturday with respect to the amendments introduced to the Vancouver act of incorporation.

The Speaker decided that the amendments had not had notice given of it by petition or notice and was therefore out of order.

The House then adjourned until tomorrow.

Victoria, March 6th, 1906. The estimates went through the committee of the House to-day. Shortly before six o'clock the debate on the budget closed.

The government side refused to be drawn into any discussion on the question of a risk a defence of the legislation which they had fathered during their tenure of office.

For the opposition J. R. Brown, J. Murphy, J. N. Evans and W. C. Wells delivered splendid speeches condemning the government's policy.

Mr. Brown showed how the government had allowed the C. P. R. and also F. Augustus Heine to escape taxation. He showed that the C. P. R. had not paid taxes on the lands in dealing with those seeking free pre-emptions on them.

Mr. Brown revealed a most startling condition of the railway question. He showed that the C. P. R. had not paid taxes on the lands in dealing with those seeking free pre-emptions on them.

the company rates upon all the timber cut upon the land. The coal and petroleum also was to revert to the railway company upon compensation according to the deed granted the pre-emptor by the company.

The land laws were so arranged that the company and the pre-emptor should be rendered itself liable to taxation. The company had alienated about 342,548 acres, 290,000 of this was taxable and 50,000 had gone to the Dominion government.

He thought that if the finance minister would lend his assistance to the founding of a bank for the province it would be a benefit. He was informed that \$12,000,000 from the province went to the Northwest for investments.

What had this government done for railway construction? At the first session a policy was promised. Yet nothing came. Last session a railway policy was promised. None was introduced.

The government was also pledged to control of telephones. Yet nothing had been done. The School Act was in that direction and it would be interesting to watch the support Mr. Elliott got from the government side.

The government had been so dilatory in getting the bill through that it was now being built without aid. This grant was only prevented by some members on the other side refusing to allow it.

The bill was not introduced," said W. J. Ewens. "For the good reason that if it had the government would have gone down," replied Mr. Henderson.

Mr. Henderson then took up the question of Mr. Heine being allowed to hold lands without any taxes being levied on them. He was informed that there were on the lands \$1,000,000 worth of timber.

Mr. Henderson then took up the question of Mr. Heine being allowed to hold lands without any taxes being levied on them. He was informed that there were on the lands \$1,000,000 worth of timber.

Le received in its favor from the district. Stuart Henderson.

Stuart Henderson said that there was a wonderful game about the public accounts from year to year. Succeeding finance ministers of government all seemed to fall under the control of the clerk of the office.

He thought that if the finance minister would lend his assistance to the founding of a bank for the province it would be a benefit. He was informed that \$12,000,000 from the province went to the Northwest for investments.

from his observation figures were the biggest liars on earth, and it all depended on how they were handled and who handled them.

The present government after assuming power had brought down pre-empting estimates amounting in all to \$25,000,000.

Mr. Wells went into the items which the government of which he was a member could be held responsible for and showed that on a liberal allowance \$90,000 was chargeable to that government. The remainder of the supplementaries, \$254,645, could be charged to the present government.

The Member for Okanagan, the man who has put up a strenuous fight for the Midway and Vernon Road.

and the excessive taxation imposed by this government. The minister of finance when in opposition had made a strong plea in favor of collecting taxes from the E. & N. But there was nothing said about the C. P. R. being taxed.

Mr. Henderson took up the question of the loan floated by the government for which tenders were not asked. It was handed over to the committee the government selected.

If there had been the proper taxation of these railways all this excessive taxation would have been found unnecessary. W. Manson.

W. Manson denied that this government had legislated in favor of large corporations. It was an easy matter to criticize taxation. The government, however, had done a necessary work and faced this question. The taxation of railway companies had been increased from \$18 to \$80.

It necessary to float a loan of \$1,000,000 to meet a deficit which the late government would have kept to \$24,000. The loan was floated under conditions the most disastrous to the province of any ever floated in the Dominion.

The government defended this on the ground that President Walker of the Bank of Commerce said that this was the only way open. Mr. Walker had taken a very dismal view.

Up to June last the minister was able to show \$288,000 of a surplus. Of this \$23,000 was due to the Chinese Immigration Act received from the Dominion government. There was a surplus, therefore, of about \$45,000.

The government to set that surplus to work in the following items: The surplus of \$140,000 from the previous government, \$400,000 of additional taxation, \$1,000,000 loan, and \$400,000 from the Chinese Immigration Act, making a total of \$2,000,000.
