

# It's your Health It's your choice

**Q:** How does the plan work when I need to get a prescription?

**A:** Present your pay direct card to the pharmacist when picking up your prescription. You will pay the uncovered portion. The pay direct card is accepted by over 90% of all drugstores in Canada (*The pharmacist is reimbursed directly by the insurance company*). Just think, no trips to a business office and no forms to fill out every time you need to get a prescription.

**Q:** Are oral contraceptives included in the Student Health Plan?

**A:** Yes, they are. Oral contraceptives are not only the most frequently claimed drugs but they are also the single most important drug included in a student health plan.

**Q:** What if I am already covered under another health plan (*i.e. parents*)?

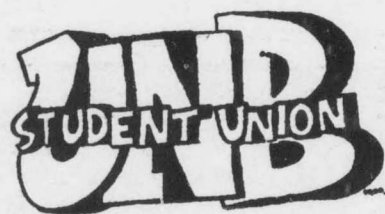

**A:** The Student Health Plan includes an opt-out clause for those students who may already be covered under another health plan (*spouse's, employers' or parents*). Visit the Student Union within the first four to six weeks of classes.

**Q:** Will the Student Health Plan cover my kids and spouse?

**A:** Yes, simply go to the Student Union to pay the additional fee (*usually the first four to six weeks of classes which corresponds to the opt-out period*).

**Q:** Does "spouse" include same-sex partners?

**A:** Yes, it does. The Student Health Plan also covers common-law partners.
