APPLES, CANNED

United Kingdom

Imports into United Kingdom: 1930 (Calendar Year)

No separate British statistics - this product is included under heading "Other Fruits".

Exports from Canada to U.K.: Fiscal Year ending Mar. 31/31

Bureau of Statistics figures not shown separately, but indicated under heading "Other Fruits".
From Fruit Branch, Dept. of Agriculture records, Canada shipped to the U.K. during calendar year 1931, 47,196 cases (about 2,123,820 lbs.) valued at approximately $85,000.

Canadian Production:	Calendar Year 1929 -	331,691 cases	$789,156
	" " 1930 -	19,097 "	128,055

Canadian Potential Production: 100% increase.

British Tariff:

Preserved without sugar and with chemicals or artificial heat	-	Free	-	25% ad val.
Preserved with sugar	-	Sugar duty	-	Sugar duty but not less than 10% ad val.

Remarks:

United States statistics show that the United States shipped to Great Britain during the year 1930, 14,595,819 lbs. valued at $742,777.

A large and growing demand exists in the U.K. Chief competition is from states of Washington, Oregon and California, and in the last few years from Russia. Canada has an almost unlimited productive capacity.

Recommendation: An important item in which Canada should strive to have a tariff against non-Empire countries of 25% when packed without sugar, and 25%, plus sugar duty, when packed with sugar. Empire products should be admitted free, except for duty on sugar content.
