

## SPECIFIC REMEDY FOR CONSUMPTION.

### WINCHESTER'S

GENUINE PREPARATION OF THE

## HYPOPHOSPHITES OF LIME AND SODA, [The Discovery of Dr. J. F. CHURCHILL, of Paris,] for the prevention and cure of CONSUMPTION.

And also for Nervous Diseases, Dyspepsia, Debility, Asthma, Bronchitis, Scrophula, Chlorosis, Female Complaints, &c.

The extraordinary results obtained in all Stages of Pulmonary Disease by Dr. Churchill's new Treatment, the Hypophosphites of Lime and Soda, removes all remaining doubt as to the inestimable value of this discovery. Consumption is no longer to be regarded as an incurable malady.

#### Special Effects of the Treatment.

The Hypophosphites have a two-fold and specific action: on the one hand, they increase the Principle, whatever that may be, which constitutes nervous force; and, on the other, they are the most powerful blood generating agents, far superior to any hitherto known. Their physiological effects are shown by an increase of nervous power, sometimes even from the first day of their administration, together with an unusual feeling of comfort and strength. The nervous symptoms, if there have been any, disappear, as well as the functional derangements, such as weight, &c., of the intestinal mucous surface. The appetite increases, often in an extraordinary manner. The evacuations become regular and more abundant; the inspirations, if they have existed, cease; sleep becomes calm and profound.
