

TO OUR READERS.

In again placing this Annual before the people of Canada, neither trouble nor expense has been spared to make it of even greater value than previous issues. Circulating as it does over the whole of this wide Dominion of Canada, it has become as "familiar as household words" in the homes of the people, from the storm beaten and fog covered coasts of Newfoundland, to the sunny shores of the Pacific slope, embracing, in the vast intervals between, the Maritime Provinces of Nova Scotia, New Brunswick and Prince Edward Island; the cities, farms and river-laved lands of Quebec; the many thriving towns and agricultural districts of Ontario, and the rapidly advancing Province of Manitoba, with those vast territories that lie to the North-West of the "Prairie Province."

In almost every home throughout the length and breadth of the Dominion, sickness, in one or the other of its invidious forms, will enter during the year 1887. That all may know exactly what remedies to avail themselves of, as well as just where to obtain them in time of need **Brayley's Almanac** is issued.

Thousands on thousands of copies in both the English and French languages have been every year distributed gratis, until **Brayley's Almanac**, owing to its reliable advice as to the proper remedies necessary to cure all cases of sickness, has come to be looked for by all as a valued and most welcome friend.

The greatest care is taken with the Astronomical and Meteorological calculations, which are made by a gentleman considered one of the best authorities as regards these sciences Canada has ever seen.

All the information and accuracy obtained in the costly Ephemerides and Nautical Almanacs issued by the British and American Governments, is herewith given to the public of Canada, free.

The Meteorological forecasts, as many of our readers have lived to prove, are entirely distinct from the miserable guesses which brought weather Almanacs into ridicule half-a-century ago, and are almost as reliable as the medicines which we advertise.

These are, in brief, as will be found more fully described in the pages which follow; **Dr. Wilson's Family Anti-Bilious and Preserving Pills**, the very best known remedy for the various biliousnesses and derangements that attack the digestive and assimilative organs.

These organs must be attended to by every one, or else disease ensues, and to keep the people of Canada healthy and entirely free from such diseases, Dr. Wilson produced, and Mr. Brayley decided to bring upon the market, these invaluable Anti-Bilious and Preserving Pills.

Diseases of the Chest and Lungs are unfortunately very prevalent in Canada, owing, doubtless, to our northern situation. To obviate the evils produced by such diseases **Dr. Wilson's Pulmonary Cherry Balsam** is a most invaluable remedy, as will be found by its description further on.

Children are the hope of a free country, and it is of vital importance that they be kept healthy, in order that a sound mind may grow in a sound body.

Of all juvenile ailments, not one is of greater frequency than that of Worms, and to get rid of this disagreeable of disorders no medicine can possibly be of greater value and efficacy than **Wright's Vermifuge**. It has been found invaluable in a very large number of cases.

In a country like Canada, where out of door work is greatly prevalent, nothing is more common than those minor accidents which occur on the farm, in the fields, on river and lake, in the logging camp, or the hunting excursion.

Suffering, even in cases where the hurt is but slight, is often excruciating for a time, especially when no remedy is immediately at hand as a curative. This is beginning to be more widely understood, until now farmers, lumbermen and sportsmen alike provide themselves ere departing from the stores, with supplies of the best known remedy in such cases, viz.: **Dr. Dow's Sturgeon Oil Liniment**.

The most invidious diseases need a more powerful remedy than any of the foregoing to eradicate them from the system, and for such **Dr. Wilson's Tonic and Sarsaparillian Elixir** has been prepared. It is a wonderful medicine, and as such is fully described further on.

Another invaluable specific, more valuable to sufferers than the gold of Ophir, is **Dr. Wilson's Cramp and Pain Reliever**, useful both as an internal and external remedy.

The light of the body is effectually preserved, and in temporary or partial cases of blindness from inflammation, etc., fully restored by the use of **Roberts' Eye Water**, highly recommended as it is by medical practitioners in Canada.

Beside the above, mention in their proper places of the remainder of **Brayley's Proprietary Medicines** will be found in this most useful Annual. These other Medicines are, briefly: **Dr. Wilson's Persian Salve**, for all diseases of the skin; the wonderful **French Magnetic Oil**; **Hurd's Hair Vitalizer**, for restoring gray hair; **Dr. Wilson's Worm Lozenges** and **Dr. Wilson's Herbine Bitters**.

All these remedies are invaluable.
