THE YIELD IS WHAT COUNTS

Mammoth Southern.
 Giant Prolific.
 Yellow Dent.
 Leaming Yellow—early maturing.
 White Cap Yellow Dent—early maturing.
 Red Cob White.

Read the yield from one who has tried our Mammoth Southern, and knows what it is. Don't let your dealer catch you with some cheap John variety by that name. Get the PURE article—take no other. Write us if your dealer does not keep ours, and we will tell you where to get it pure. Blood will tell.

Messes. E. R. ULRICH & SONS, Springfield, Ill.
 Gentlemen,—I used to buy seed corn from you several years ago, and it was always good, and gave me great crops, 20 to 24 tons to the acre, but late years I have bought my seed corn from _____ from which I have had poor crops, yielding 4 to 6 tons less per acre than what I got from your seed. Two years ago, one-half of my seed failed to grow at all. I had to replant with other seed. Are you still selling that good, sound, Mammoth Southern Sweet Corn that I used to buy from you? If so, what would it cost me per bushel, delivered in Bond; and have you some good earlier varieties that you can recommend as large yielders of ensilage? We like some earlier that will mature for ensilage. Earlier varieties make richer and sweeter silage, but not so much of it to the acre. I grow 60 acres for silage. Yours truly,
E. E. TILLSON.

Giant Prolific yielded on Government Farm, Agassiz, B.C., summer of 1898, 38 tons and 450 lbs. on one acre.
