MISSOURI COLLEGE OF AGRICULTURE.  
Columbia, Mo., Oct. 30, 1901.  
The machine (U.S.) did excellent work, and, as a rule, I believe it skimmed a little closer than the others we had in use. The record was invariably .02 of 1 per cent. or lower, sometimes a mere trace of fat in the skim milk.

ILLINOIS COLLEGE OF AGRICULTURE.  
Urbana, Ill., June 29, 1901.  
Enclosed find records of work done with your 3 cream separators (U.S.) at the Dairy School. These are very creditable records, and we think any cream separator company can feel proud of them. Your machines have not given us the slightest trouble during the semester.

**RECORD AT THE PAN-AMERICAN MODEL DAIRY**

DeLaval average skim milk test.	.0172,	butter milk test.	.121
United States	" "	" "	.109
Gain of U.S. over DeLaval	.0034		.012

The above shows that the DeLaval Separator left 25 per cent. more butter fat in the skim milk than the United States. An immense waste that amounts to a very large sum of money upon the dairy products of the world. Enough to pay for a United States Separator to replace every DeLaval Separator now in use.

PROF. SPILLMAN, Director Washington Experiment Station, in *Ranch and Range*, Seattle, Aug. 15, 1901, reports the following tests of skim milk from dairymen using the U. S. Separator:  
.00, .00, .01, .01, .04
