CORRESPONDENCE INVITED

54 King Street West, TORONTO**Mercantile Summary.**

The North-Western Gas and Oil Company, it is said, have succeeded in striking gas in the eastern part of Edmonton, Alta., at a depth of 1,450 feet. The business men of the city are naturally rejoiced at the prospects opening up before them of cheap light, heat and power.

The Dominion Government has granted the request of a large proportion of the citizens of Morrisburg, Ont., that the town should acquire the surplus water-power, amounting to about 750 horse-power, from the canal. A large part of the available power is to be utilized by the tin-plate industry which is to be established in the town.

The Canada Chemical Manufacturing Company have decided to erect somewhere in Central Ontario, probably in the vicinity of the Marmora mining region, a large plant for the production of sulphuric and nitric acids and of sulphur by-products. Quantities of sulphur ore exist near Marmora, and it is believed that it can be produced in this country in sufficiency to take the place of that imported from Sicily and South America.

A conspicuous departure in the lighting of canals is that of the Welland Canal near St. Catharines, Ontario. Over 600 A.C. series arc lamps have been provided by the Canadian Westinghouse Company, and these have been in operation for the past few months and, we are told, have given excellent service. This installation as a whole reflects great credit upon the Ontario Government, as well as on the consulting engineer, Mr. R. J. Parker, under whose direction the complete plant was installed.

The C.P.R. announces that it hopes to complete the connection of Wetaskiwin, Alta., with Saskatoon, Sask., next summer, and then an additional 150 miles will be built east from the latter point towards the present terminus of the Pheasant Hills branch at Strassburg. Besides these extensions, which will practically give the C.P.R. a second transprairie line, there will be construction work on north and south extensions on the main line, which will run north from Moose Jaw. Twenty-eight miles will be constructed. On the Wolseley-Reston branch forty-five miles will be ready for the operating department. It is reported that engineers are working westward from Wetaskiwin toward the Yellow Head Pass.
