THIS BINDER Won't Go To the Fence

Testing binders in Manitoba is strenuous business. They have no patience with weak-back machines. If a binder can't stand the strain of continuous hustle all day place. That's why our No. 3 Binder is so popular with Canadian farmers—it won't go to the fence. It doesn't disappoint them when the hard, rushing harvest-time is on. No worrying, fretting with broken pitman, or tangled twine, or stuffed elevator.

Our No. 3 Binder is strong, light, easily handled; has great elevating power and delivers the bundles securely tied. Eccentric wheel which moves Knotter and Discharge Arms is found exclusively on our binder, and gives an increase of power of about 16 percent. The Knotter

Never Misses a Sheaf

The binder tension allows all knots to pass through without a hitch. Binder attachment is carefully adjusted and tested before it leaves the factory. It will surely work right in the field. Neck-weight is light; there is no side draft. Two horses are sufficient on average ground, because roller and ball bearings are placed at every necessary point. It makes no difference how rough the field, how tangled, twisted or heavy the grain, it cuts, ties and delivers each bundle with remarkable regularity. No. 3 Binder is made in 5, 6, 7 and 8 foot widths. But send for our free catalog "Why" and read all about our No. 3. There are plenty of pictures that explain why it's just the machine for your work. Why not write us now—today? We have an agent in your vicinity because our organization covers the whole of Canada. Consult this agent—he will gladly answer all questions.
