**Calgary Bull Sale**

Continued from Page 19

timer, Bowden, for "Gainford Duke," a two-year-old which was awarded the Alberta-bred championship in the show. A brother of this bull, "Gainford Model," reserve champion in the show, brought \$440. Another high price paid for a Shorthorn was \$465, paid by Yule & Bowes, Calgary, for "Gloster's King," a two-year-old, to James Burns, Hanna, Alta. Lew Hutchinson, Duhamel, Alta., sold the highest priced Aberdeen Angus, "Duhamel Isadore," for \$315.

A. Robertson sold seven bulls, four of which were yearlings, for \$2,185. O. A. Boggs, Daysland, sold three for \$1,395. Mace, of High River, sold thirteen of his own breeding for \$4,415. Frank Collicut got \$1,780 for five. Fred Cowman, Cremona, sold twelve for \$4,075. The proceeds from the sale of one bull, which brought \$270, he donated to the Patriotic Fund. Chas. Lyall, Strome, averaged \$302 for seven Shorthorns. James Sharp, Lacombe, got \$1,395 for five, and his brother averaged \$290.50 on fourteen of the same breed. J. L. Walters had eighteen Shorthorns that netted him \$4,365., an average of \$242.50.

**LICE—ABORTION—CEMENT**

Some of our colts had lice on them when they came off the range last fall. Could you tell us how to prevent this?—H.G.S., Alta.

Coal oil will completely destroy lice on stock of any kind. One application is sufficient. An emulsion of soap and coal oil can probably be used more easily. Dissolve a small cake of soap in water and add coal oil. Use a woolen cloth and go over the animal thoroughly, rubbing well in, but do not use more oil than sufficient to grease it over. This kills nits also. The prevention of your stock from getting lice on them is a difficult matter on the range, i.e., if they are running free with stock belonging to other people. You will have to free them from lice and then run them where they will not be exposed to these mites.

One of our mares lost her colt this winter. Would it be advisable to breed her this year?—H.G.S., Alta.

There seems no good reason why you should not breed your mare this year, if the abortion was due to injury, inflammation, slipping or jumping or some such cause, care should be taken that the mare has fully recovered and is in good health at the time served. It is possible abortion may have been due to some poison or frosted food, or even to weakness or low condition of the sire at the time of service. In these cases there is no reason why the mare should not be bred again as soon as she is better, tho it should not be before a month or even six weeks. As long as there is any discharge and for some time afterward let her remain not bred.

For a concrete cistern what materials should be used and in what proportion? What amount of each material would it take to a cubic yard?—H.G.S., Man. Alta.

For a concrete cistern 8 ft. by 8 ft. by 8 ft., eight cubic yards of bank run gravel and fifty-four bags of cement should be used, or instead eight cubic yards crushed stone, four cubic yards sand and fifty-four bags cement. The proper mixture for such a structure would be 1:2:4, that is one barrel-four bags—Portland cement to two barrels of lime sand to four barrels of lime gravel or broken stone. For one cubic yard of rammed concrete approximately six bags of cement, .45 cubic yards of sand and nine tenths of one cubic yard of stone would be necessary. This would build the walls and floor six inches thick and a roof four inches thick over all.

Insure good feeding during the busy spring and summer months by preparing at once feeds such as ground grains, cut hay and mixed meals.

A piece of good pasture set aside for the sows and litters will give excellent returns; the following make good pasture—Alfalfa, Peas, Rye, oats or grasses.

On request we will Wire or Phone Higher Prices than any competitor for grain of any kind, for shipment to, or in store either Government interior or any Terminal Elevator, and will make Highest Cash Advance to shippers who sell, or who wish to hold their grain.

705 Union Trust Building, Winnipeg

NOTE: Even after its experience of nearly a century, Case is not content to publish advertisements unless based on the very latest authoritative information. This is one of a series of messages to farmers, prepared after visiting tractor demonstrations, talking to hundreds of farmers, and carrying on a national investigation through our sales organization and by mail to find the gas tractor needs of the farmers.

**A Tractor** **Not Too Small**  
**Not Too Light**  
**Not Too Cheap**

Whichever size of Case Tractors is suitable for your farms, you can bank on its being the best of its kind in the market, made honestly and conscientiously, to uphold our name and fame. In the field and in our laboratories we have carried on tests and we know from experience what is best to incorporate in a tractor. In its class, each Case Tractor is a masterpiece, embodying all the best features. Why be satisfied, then, with lesser quality? Why choose as your investment a tractor that has fewer years of experience behind it? Case has been in business 24 years. You would not buy an experimental automobile. Then why a tractor except from a company long engaged in making agricultural machinery? To do otherwise is to take an unnecessary risk.

**More Economical Than Cheaper Tractors**

You want a real, everyday tractor, one that is backed by a reputation. We say that a Case tractor costs less than cheaper tractors because it is built honestly and carefully. Case principles are right, and no Case tractor is too small, too light or too cheap. Case tractors are built to uphold a name and fame that must not be dimmed, so they will not be claimed by tractor graveyards. The wise farmer who chooses a Case is bound to increase his farm profits. He need never experiment with one tractor and then another. He need never fear that he will be caught with an orphaned tractor on his hands.

From an Actual Photograph of a Case 10-20

**"Horse Poor"**

Too many farmers are unable to put their farms on a profitable basis. Too many farms are over-horsed, but under-powered. A farm must be put on an earning basis like other businesses. Case Tractors reduce the cost for horses and men.

**Case Leads**

The Case Tractors are made in the Case Shops by Case workmen. This includes our specially designed tractor motors. Because of our reputation, you can depend on our engines delivering the power. It is simple, efficient, economical, constant. At all the tractor demonstrations this year, the Case Tractors commanded the attention of thinking, studious farmers, who were planning to do away with costly methods and claim the profits that rightfully belong to them. Men admired Case simplicity, and contrasted our experienced engineering methods with the many types recently introduced. Some men expected to find Case tractors suitable only for large farms, but were pleasantly surprised to find our line included all sizes, suitable for all farms. Case gas tractors are in four sizes—the 10-20, 20-40 and 30-60.

**J. I. Case Threshing Machine Co., Inc.**

729 Erie St., Racine, Wis.

Founded 1842

**Leaders in Other Lines of Agricultural Machinery**

Case steam engines, Case threshing machines, Case road machinery, Case automobiles, and every Case product is each a dominant factor in its own field. Write today for our complete Case Catalog. It is an album of information that should be under the reading lamp in every farm sitting room. It is beautifully printed, with many interesting scenes and reproductions in color. No farmer should miss having it. Especially when it costs you only one penny for a postal card to get it. Merely write, "Send me your general machinery catalog."
