It was this information which caused the president to send out his recent note on the subject of peace which has so puzzled the students of international politics all over the world. It was this information, which must have been in the mind of Mr. Lansing, the secretary of state, when he said the United States was "on the verge of war." The President has reports to this effect from members of the diploma-

tic corps in Germany.

The German people believe if their submarines are permitted a free rein ingland can be starved.

********** Cook's Cotton Root Compound THANKS RETURNED

Editor Brantford Courier Sir: At this season of the year, when compliments and kindliness are eminently appropriate, I wish to convey to the press of Brantford, my sincere thanks for the great liberality with which the efforts of the Canadian Engineers (on behalf of enlistment) have been made known and promoted through the news

It was not until the 5th that the Engineers secured a location in Brantford, at 94 Dalhousie street, to use as a recruiting office (their work) and special claims upon the young men of the city were then un-known. That office being renovated and smartened up, is now replete with advertising matter, and calls of all kinds to the boys, is open all day to afford information. The work and location of the Engineers and their claims are now known through-out the city and vicinity, and the discrimination of that knowledge is largely attributable to the wide pubicity given so freely and gratuitous ly by the local press, and it is to give you our sincere thanks for this valuable and timely aid that I ask space for this letter.
