ACTIVITIES OF THE FOOD CONTROLLER

Campaign for Increased Hog Production—Restaurant Keepers Fined For Not Observing Food Restrictions

Production of Hogs

As a result of co-operation between the Food Controller and the Federal Department of Agriculture, the farmers throughout the Dominion have been informed of the necessity of increasing the production of hogs in Canada, and campaigns have been launched in every province under the direction of the Provincial Department of Agriculture.

Steps have been taken by the Food Controller to conserve breeding stock, as part of the campaign for increased production of food animals.

A committee is engaged in the preparation of a report in regard to licensing of the sale of cereal foods in smaller packages than 20 pounds weight.

Restaurant Keepers Fined

Prosecutions have been instituted in a number of cases against restaurant keepers who have failed to comply with the requirements of the Order in Council restricting the use of beef and bacon, and requiring that substitutes for white bread be provided in all public eating places. Action is pending in other cases.

Regulation of the price of Western winter-caught fish has been considered by the Food Controller, and a plan prepared. Joint action by the authorities of the United States and Canada is contemplated in order to make it effective.

"Either the stay-at-homes must save so that the soldiers may get their vital needs, or the soldiers must go short so that the stay-at-homes may fatten. You cannot have it both ways and must take your choice," says Lord Northcliffe.

Represents Canada's Interests

Mr. J. R. Bruce, agent of the Royal Bank of Canada in New York, has been appointed by the Food Controller to represent Canada's interests before the International Sugar Commission which is now sitting at 111 Wall street, New York city.

Food Controller's Duty

Speaking recently in Ottawa, Ven. Archdeacon Cody of Toronto said that there appeared to be a widespread misunderstanding with regard to the functions of the Food Controller, whose primary duty was not to determine the price of foodstuffs but to see to it that there was a sufficient supply for export.

Hotels Effect Saving

Cards have been issued from the Food Controller's office to about 50 of the leading hotels and restaurants throughout Canada with blanks to be filled in, showing the saving effected by white flax, beet and other European trade conditions make such substitution extremely difficult.

More Sheep Called For

While special emphasis has been laid on the increased production of hogs, more sheep are needed also. The increase in the number of sheep in all Canada this year amounted to 300,000 head, or 15 per cent.

Wheat is the Grain

Wheat is the grain above all others that the Food Controller wants the people of Canada to produce and to save for export—and why? Three grains—wheat, rye and barley—are particularly suited to making bread. None of these three will make it as it is commonly known. There are at least two strong reasons why the Allies cannot use other cereals entirely to make up their deficiency in wheat: (1) People who are working under unusual stress are not in a situation to tolerate any marked deviation from their diet; (2) European trade conditions make such substitution extremely difficult.

"IT KEPT ME ON PAYROLL," HE SAYS

Cochrane Was on Verge of Quitting Job When He Began Taking Tanlac

Prince Edward Island studying the potato situation with a view to facilitating the marketing of the surplus crop.

In Charlottetown, P.E.I., 1,529 homes have pledged themselves by cards to save food. This represents about 95 per cent. of the people of the city.

There are 1,000 employees of the United States Food Administration in the offices of the central organization at Washington. Besides the central staffs, there is a large organization in each of the States under direction of the State Food Administration.

Do Not Hoard Sugar

Information secured by the Food Controller's office appears to indicate that there is sufficient sugar in Canada for all ordinary needs. Many consumers, however, have purchased more than is sufficient for their immediate requirements, and if this hoarding is continued, there is danger that those who have not been in a position to purchase large quantities may be unable to secure as much as they actually need. Hoarding is both unpatriotic and unwise. Householders are asked to buy only as much as they need for immediate use, and retailers are requested not to sell more than one week's supply plan prepared. Joint action by the authorities of the United States and Canada is contemplated in order to make it effective.

Either the stay-at-homes must save so that the soldiers may get their vital needs, or the soldiers must go short so that the stay-at-homes may fatten. You cannot have it both ways and must take your choice," says Lord Northcliffe.
