### Alberta Hog Production

Expected That Good Supply of  
Rough Grains Will Stimulate  
Interest.

Alberta hog producers are little concerned about any British subsidy of five cents a pound on Canadian bacon. As a matter of fact there are practically no hogs in the country. This is accounted for owing to the enormous price of feed last year when the majority of farmers discontinued hog breeding. With the changed conditions this fall, when rough grains are plentiful there will undoubtedly be a large number of raisers again engaged in the industry, but they state it will be at least twelve months before they are in a position to supply the home and coast market, and that two years must elapse—even if there is again a good crop of coarse grains in the meantime—before they will be in a position to enter the export trade.
