Gold and a Skeleton

A little more than a year ago, or on a day of October, 1871, a miner, riding a fine mare and followed by a colt, came, into the town of Bandack, Montains, for supplies, in the purchase of which no displayed such a liberal quantity of the precious dust as to excite the inquisitive comments of the lookers on. Responding displayed such a flocrat quantity of precious dust as to excite the inquisitive comments of the lookers on. Responding to the curiosity of these, with apparent frankness and a peculiar air of suppressed exultation, he declared that, after long years of musuccessful gold-seeking n all these mines of the world, he had at has found a glorious rich "placer," bearing wealth beyond computation. It was on one of the tributaries of the Big Hole River, in the heart of a great wood; and when he had gathered his, own fortune, and called a few faithful friends from the East to gather theirs, the whole world should know the place. Not until then, however, abould any mortal be inforced of the true trait and he would not have taken the shoot and man escalartaking to speaker them.

STRANGE AND PAINFUL ACCIDENT .- A Strange and painful accident occurred at Raymond's Sewing Machine Factory on Friday evening. An employee named John Platt was standing alongside of a fly-wheel looking at another operative working, when, by some means, one of his arms became entangled in the wheel, breaking it at least in one place, and it is supposed in two—first above the wrist, and it is thought at the wrist also.
