The difference in the reports disgusted the simple inquir-er after truth. It has since been found that soil and climate have much to do in cious stenes. He has five dozen pairs of

Mr. S. Folsom inquires as to the ought to shrink from recognizing it,healthfulness for cows of the new process that, while on the one hand the number nut meats. Flavor to taste, and when partially cool, spread between each two layers.

KILLING PARASITIC INSECTS.—I send you the following cure for scald head, ringworm, granulated lids, scab in sheep, foot-rot, vermin in sheep, and skin poisoning of every description. I have cured a great many cases of these diseases. I have eyelids when the lashes have been eaten off with disease, by a few applications of this mixture. It has proved equally successful in ivy poisoning when the man was fearfully poisoned. A week since a man came to mean the lash was a constant. It is not always to feed meal, set of well in send to supply mostly protein; linseed cake by the old process was too liable in such a case to overcharge the ration with fat. —Prof. G. C. Caldwell, University.

To the question, which is the better way to feed meal, wet or dry? The answer is, there is no difference. The simple fact of wetting meal with cold water is no advantage. If soaked till near the point of souring, or wet with boiling water and fed when cooled, digestion would doubtless be facilitated. The best way to feed meal to cattle I have ever tried is to take hay or coarse fod-
