At the City Hall.

The weekly session of the Municipal Board took place yesterday afternoon. Mr. Goelling presiding. The only member absent was Mr. Jackman.

Mr. Mullaly asked if any action had been taken as to beautifying Cathedral Park, as requested the previous week. There had been nothing done and it was ordered that Engineer Ryan visit the place and see what was necessary to be done.

Mr. Anderson said that goats were constantly in the small park near the East End Fire Hall and destroying trees there. The question then arose of where is the Impounder, who is he, and how much salary does he get. He gets \$36.50 per month and all perquisites, that is, \$2 for every horse or cow impounded and 50c. for a goat.

Mr. Anderson thought that because less commission was paid for catching goats the Impounder was directing his attention to other animals that gave him a better income, thereby allowing goats to roam the city unmolested and destroy what property they liked.

The Secretary reported that he had learned on various occasions from the Impounder that it was almost an impossibility to catch a goat and seldom when he did succeed in catching one the women of the neighbourhood would attack the Impounder and that in all cases he would have to surrender it. However, the decision reached by the Board was that the Impounder should give returns to the Secretary as to how many animals he had impounded, as it was learned he (the Impounder) was making a bonanza of it.

The bill of \$31 for watering the dredge Priestman was returned by the Marine and Fisheries Department unpaid, accompanied by a letter intimating that owing to the amount of good work that the dredge was doing in the city coves the bill should not be collected. Much discussion followed and it was decided not to collect the bill.

I. G. Sullivan reported that the installation of proposed oil tanks by Job Bros. and Co. was not dangerous to fire. Referred to Solicitor.

Mr. M. J. McEvoy referred to the injustice done him in collecting taxes from him. A report from the Solicitor will be had on the matter.

An application from R. Hopkins for a position was filed.

Mr. B. Dunfield complained of unfair treatment to impounded cattle. Not true.

W. C. Young asked that a light be placed near his residence, Freshwater Road. Referred to Lighting Committee.

Mr. P. C. Mars asked Council's opinion of the calcium chloride as a dust consumer. The Secretary will reply.

Mr. P. Myrick was given permission to make repairs to Fishermen's Institute, subject to the approval of the Engineer.

Kent and Co. were awarded contract to supply quarry spawls at 55 cents a ton. That was the lowest tender.

An exhaustive and interesting report was received from the Sanitary Committee and many practical suggestions were received and will be considered at next meeting.

Mr. Bradshaw mentioned that about \$12,000 worth of goods upon which about \$3,500 duty were collected. He was of the opinion that this duty money should be got back by the city and that there should be places in the city for keeping the Council's stores the same as applies to H. M. S. Cayluso. The suggestion was endorsed and the Secretary will write the Assistant Collector of Customs about the matter.

Several of the plans were approved, but the Engineer was instructed that no water service would be given until proper sanitary arrangements were made.

Residents of Beaumont Street complained re the improper filling of opening made for laying of water and sewerage pipes in that section. The Council hopes to overcome the irregular system complained of, but at all times residents must remember that the streets are opened for them to make connections.

The Health Officers report was read. It was decided that the Health Officer be asked to meet a committee from the Board to discuss matters in connection with his department. The meeting will take place next week.

On motion of Messrs. McNamara and Morris it was decided that in future meetings the regular sessions will be held at 8 p.m. on Fridays instead of 3.30 p.m. as heretofore.

The meeting adjourned at 6.15 p.m.

More Fires.

Fires provoke immediate sympathy for the sufferer and also thankfulness for personal escape. Another thought should be whether one is personally and sufficiently protected? An insurance policy with Perle Johnson would provide for you this desired security and at small expense. Have you enough insurance?

SAFETY CITY NEWS

Safety First!

The chauffeurs and drivers of vehicles of all kinds should be most careful when crossing car tracks. If they do not regard for their own safety, they will not take any chances cutting across the tracks in front of moving street cars. Nor will they continue to drive on the tracks in front of cars after the first warning clang of the bell.

DUNLOP TRACTION

Master of the Road.

The only real anti-skid.

66 Cubic Inches larger.

Never did Rim-Cut.

"Most envied Tire in all America."

The Battle Cry is on!

All over the country the people are of one voice in the fight for "Safety First."

More than two years ago we were telling motorists that Safety was the First Consideration in buying tires. We knew then, as we know now, that Dunlop Traction Tread is the one tire which ensures Safety in automobilism.

Dunlop Traction Tread having settled the point of the motorist's Safety, the battle cry is now tending to the Safety of "the man on the street." But Dunlop Traction Tread while protecting the motorist in his car also protects the pedestrian, even if he is negligent in his own regard, because perfect control of the car means perfect control of the situation. The Master Tire is always master of events.
