Fearn's resolution and it was carried.

Hon. J. Anderson asked if an attempt had been made by anyone to get tonnage as needed and failed. The Chairman replied that efforts were made for the obtaining of coal, flour, salt and codfish carriers and that the results were already known. He pointed out that the principal question to deaf with now was the engaging of tonnage from Montreal, though the salt question was the most serious, as it had to do with our staple industry it had to do with our staple industry— the codfishery. In March and May, 1915, 6,000 tons of coal were received through the local steamers; in June and July, 7,000, and from August to and July, 7,000, and from August to December, 7,500, or an aggregate of 20,500 tons. These ships have since gone from Newfoundland and are not being replaced. The natural consequence is that we will be that big year. Regarding flour importations from Montreal, there is a shortage of Sub-Lieut. Cecil Clift has been recommended by his commanding officer for promotion.

from Montreal, there is a shortage of 120,000 barrels owing to no steamer running on the St. Lawrence route. The Red Cross and Furness ships can bring big freights from Halifax, but no more than they brought last year, so that the situation looks as if it cannot be relieved without a boat running in the St. Lawrence.

Don't get frightened about those words "Cod Liver." You'd never know it from the taste.

It's a real tonic containing cod liver extract, extract of malt, wild cherry and hypophosphites—a splendid com-

bination.

The cod liver extract builds you up—so does the extract of malt. The wild cherry soothes the bronchial tract and the hypophosphites supply phosphorus to the nervous system—just the thing it needs.

And the taste is pleasant.

As an all 'round tonic, strength restorer and body-builder you'll find nothing better than Nyal's Cod Liver Compound—so why look further? You will be pleased.

The price is one dollar.
