Council and the executive of the Work-
men's Legislative Clubs, held in Labor
Hall last night, it was decided to distribute

knew what it was to be a father, the Lon-
don Free Press argues that Hobbs is unfit
to be member for London. Under these
circumstances, Hobbs never knew what it
was to have a fool for a son, and that is
more than can be said for the father of the
Free Press editor, who introduces the
bachelor argument into a political cam-
paign. (Toronto Telegram.)—The degree of Bachelor of Divinity has
been conferred by Yale University on C.
B. Keenleyside, B.A., of London, formerly
of the ADVERTISER. He has also been
awarded a scholarship valued at about
\$300, should he desire to return his studies
further. Mr. Keenleyside's many friends
will be delighted to hear of his continued
success. He is now in St. Catharines, and
may be expected to wheel home in the
next day or two.

Tweedledom and Tweedledee.

The Empire must be growing nervous
about Mr. Meredith's chances in London.
It argues: "As a matter of fact Mr. Mer-
edith is not the city solicitor of Toronto.
He is corporation counsel." Will those
who were turning toward Mr. Hobbs as a
local man come back to the old allegiance
on hearing the change in the title? (Toronto Globe.)

Busy Bees Buzzing.

An entertainment given by the Busy Bee
Society of Queen's Avenue Church is sure
to be a success in every sense of the term,
and a concert given last night was no ex-

TELEPHONE 881.

THERE is an exceedingly able woman in
Boston who can report a speech delivered
rapidly in German, she first translating the
speech into English and then recording it
in stenographic characters. Such celerity
of thought is only approached by the tradi-
tion respecting Kossuth, who is said to have
thought in Hungarian, translated into Lat-
in and retranslated again, uttered at a rapid
rate the choicest English, born of a study
of the Bible and Shakespeare.WHAT will not electricity be used for
next? "Electricity in Jelly." That is
something the New York Times tells about
and says: "What electricity is doing and
will do for the table decorations is for-
shadowed in an account of a recent feast,
where a dish of jelly was illuminated by an
electric light shining through the mass.
The effect of this dish, set in flowers and
protected by a silver cover till the moment
of exposure, is very striking and original.
The use of minute electric batteries is
making most startling effects possible.
In a few flowers and food can be lighted up
in remarkable and effective ways."
