#### LOCAL MARKET.

London, Wednesday, April 19. Considerable business was transacted at the market today. There were 30 loads of hay on the stand. Sales were brisk, as all of the loads were sold at o'clock. Prices ruled at \$8 and \$5.50 per ton, more selling at the former then the last-named price.
Oats—There was a good demand for

the 20 or so loads offered. Sales were neade mostly at \$1 27 to \$1 28 per cwt. Several loads of straw sold at \$5 50 and \$6 per ton. There will be no hay offered on Friday or Saturday of this week. Those

who contemplate purchasing should do so at Thursday's market.

#### WEEKLY REVIEW. Considering that the farmers have

their spring seed, the markets held here during the past six days were about un to the average for this time of the year. The supply of small stuff was hardly sufficient for the demand. Sales in all lines have been brisk and prices Ten days ago the farmers were jubilant over the way the fall wheat was looking. During the past week the cold winds and frost have had a most injurious effect in many sections of the country within a radius of 20 or 30 miles of the city. It is not certain how much damage has been done, as reports are very conflicting. A few warm rains would overcome to a great extent the injury already done. The reports at present are anything but cheerful.

Grain-Oats are about the only offering in this line. Sales are brisk. Prices fluctuated during the week from \$1 25 to \$1 31 per cwt. Present prices are \$1 27 to \$1 28 per cwt. Hay and Straw — Hay has been freely offered. About 135 loads on sale during the past week. Prices are low-

er at \$8 and \$8 50 per ton for the best loads. Straw is easier and sales are on the slow side at \$5.50 to \$6 per ton or \$3 50 when sold by the load. Butter and Eggs-Butter is just a shade firmer at 23c to 24c per pound for rolls and 21c to 23c for crocks. Eggs are in brisk demand and will no doubt continue to be so until after Easter. Prices at present are 13c for crates and 131/2c for basket lots.

Apples—Sales continue to be on the Slow side, at \$1 to \$1.25 per barrel for a good quality, and 30c to 50c per bag.
Potatoes—Sales are slow and prices easy at 70c to 80c per bag, according to the amount of sales and the quality of the potatoes.

H. C. Becher, stock broker, Bank of Comemrce building, received the following by private wire from Bartlett, Frazier & Carrington today: New York, April 19. - Noon, - De-

velopment of fresh weakness of Northern Securities on the curb resulted in an outpouring of liquidation in the stock market, accompanied at times by quite severe declines. N. Y. C., U. S. Q., St. Paul and U. P. were the stocks, in which the sellling was heaviest. But after the first hour the pressure diminished, and some good rallies occurred. Union Pacific and U. S. Q. showed the greatest recuperative powers, both going higher than their last night's closing. The uncertainty as to the exact situation in the western railroad world is still a disquieting influence, and today rumor is current that the Union Pacific interests had sold a very large block of their Northern Securities stock, and that Mr. Hill and his friends had been free sellers of Union Pacific. In fact, all the gossip and rumors point to a lack of harmony. The disposition is still to be very conservative and it is not believed that until the street is better supplied with facts, anything like a resumption of active speculation can take place. Writ for Unstated Damages Issued On Behalf of Mrs. Clark.

A writ against the London Street Rail-way Company has been issued by Faulds & Campbell on behalf of Mrs. Frances Clark, of 26 Euclid avenue. Plaintiff claims that, while getting on a belt line car at the corner of Richmond and King streets, in March last, she was seriously injured, owing to the negligence of the company's employes. The car started, she says, before she had boarded it, and threw her to the ground, breaking her arm and causing other injuries. The writ is for unstated damages.

If Measure Does Not Go Through Breakwater May Not Be

Built This Year. That the action of the committee of the Ontario Legislature in laying over

the city of London bill re the issuing of debentures for the construction of the West London breakwater is fraught with more danger to the city than is generally known, is the opinion of several of the aldermen who have the interests of West London and the city at large at heart. When the measure came up in committee yesterday, Mr. I. F. Hellmuth opposed it on two counts. In the first

place, he argued that the city should not be given powers of expropriation of land owned by his client, Mr. J. D. Saunby, on the ground that Mr. Saunby is now the appellant in a suit which has been sent by him to the Privy Council, and any agreement he might make with the city in regard to the transfer of land, either by ordinary sale, or by expropriation, might pre-judicially affect his case in the eyes of the Privy Council,

#### The Objectionable Clause.

In the second place, the argument was put forth that it would not be right to allow the city to expropriate or otherwise secure land for the purpose of constructing a breakwater, on the understanding that the city would not be open to actions for damages which might result from the construction of the breakwater. Mr. Hellmuth painted out that his client owns land or both sides of the river, and that if the water is prevented from making its escape in its usual course on the west side it will be liable to flood to a great height on the east side, and it may be that it will result in very serious damage to the Saunby dam, which case it would be most unfair to say that Mr. Saunby shall have no means of redress. It appears, too, that the guments of Mr. Hellmuth car-ried great weight with the

Three drunks constituted the police docket this morning. It was the smallest collection since the new "ledger" was started a few weeks ago. It has been suggested that the city call a halt on the surveys for the new wall until such time as all the land required has been secured, and, further, that the city, when signing the deeds for the transfer, shall insert a

propriation agreement. Mr. Gray-

don points out that whereas the as-

could be secured for about \$5,000, it is

clause to the effect that the city shall not be liable to any person or persons whose, property the breakwater may injure. It is thought around the city hall that if this were done the people of the village will put their shoulder to the wheel and will see that those persons who are so hard to deal with re whipped into line, in order to have the breakwater constructed this year. If the city cannot come to satisfactory terms with the suburbanites the construction of the wall will be indefinitey postponed.

It is understood that the city engin-

eed has in mind a scheme to purchase a portion of the land on the east side of the north branch near the Saunby dam, for the purpose of widening the course of the river, and thus relieving the pressure on the breakwater, but it is not known what will be done in this regard now. All that Mr. Graydon will say at present is that the prophecy that the people who were shouting the loudest for the breakwater would be the first to hold the city up for high prices for their lands, has come true. And he says if the breakwater is not proceeded with this year the

people of West London need blame none but themselves. Mayor Campbell and City Solicitor Meredith returned last night from To-ronto, where they were looking after London's interests in regard to the bill

#### Meeting With the Premier.

His worship states that he was in able to arrange for a meeting between the Premier and the city council of London some day next week, but as the board of works, and Ald. Cooper and Gillean and City Engineer Graydon, are thinking of taking a trip to Bay City next week to look at the best brand of filler for the vitrified brick pavements, which are to be laid, it may be that the council will not able to wait on Mr. Whitney until the week after next.

The object of the meeting is to press the claims of the city for a grant toward the cost of the West breakwater, the former Government having promised to pay one-quarter the cost of any wall the city decided to build. Mr. Whitney did not hint at of the aldermen and City Engineer Graydon stated emphatically today his consent to a meeting with the council next week. It is probable that the city will not allow the Bay City people of West London have evinced trip to interfere with the breakwater such an uncompromising attitude on request, and even though the deputa-the matter of selling land for breakwater purposes to the city that it and the remaining members of the would not be safe for the city to go council will be sent to Toronto to keep ahead and build the big wall, unless the engagement with the Premier,
