

A PHYLACOGEN FOR TYPHOID FEVER.

An advertisement that will undoubtedly occasion widespread interest among physicians is appearing in current medical journals over the signature of Parke, Davis & Co. We refer to the announcement of Typhoid Phylacogen. The new product is prepared from pure cultures of the bacillus typhosus of Eberth and Mixed Infection Phylacogan. As the name signifies, this latest Phylacogen is indicated in the treatment of typhoid fever or any pathological condition due to infection with the bacillus typhosus. Before being formally offered to the medical profession Typhoid Phylacogen was subjected to rigid clinical tests extending over two years. The most significant fact developed by these investigations appears to have been the prompt amelioration of symptoms and rapidity of recovery in successful cases. Indeed, it is evident that, when properly treated, recovery not uncommonly takes place in approximately half the time required under conventional methods.

Parke, Davis & Co. have issued a 32-page brochure on Typhoid Phylacogen, which deals in extenso with the new method of treatment, discusses diagnosis, dosage, technique of administration, etc., and reproduces a favorable paper by a prominent physician of Montreal, read before the Medical Society of that city and later published in *L'Union Medicale du Canada*. The doctor refers at some length to a number of hospital cases treated, and concludes his paper with the significant observation that "the treatment of typhoid fever with Phylacogen gives real results." Physicians are advised to send for a copy of this "Typhoid Phylacogen" pamphlet, addressing their requests to Parke, Davis & Co., Walkerville, Ont. Eastern depot, 378 St. Paul St., Montreal, Que.

GLYCO-THYMOLINE FOR COLDS.

At this season of the year the crop of "colds" becomes very numerous.

One of the first efforts of the physician aims at relieving the congestion of the nasal mucous membrane and bring some degree of comfort to his patient.

Glyco-Thymoline in a 25% solution, used in connection with the K. & O. Nasal Douche, not only cleanses the nasal passages of the mucous secretions, but also reduces the congestion by its exosmotic action, thereby giving the patient a degree of comfort that will be thoroughly appreciated.
