The recent failure of Two Life Insurance Companies in the State of New York,

And the attention which the leading press of the United States and Canada have given to the subject of Life Insurance, have very naturally caused policy holders and intending insurers much anxiety as to the safety of the provision sought to be made and led them to ask the question, "What will render Life Insurance Companies safe beyond all doubt?"

The question is proper and all important. The following will be a good answer:

- 1st. By adopting a Table of Mortality, which has been proved by experience to be correct, and consequently safe.
- 2nd. By using a rate of interest sufficiently low to be certain of attainment during the many years covered by an insurance contract, and to compensate for any loss by bad investments or otherwise.
- 3rd. By ANNUAL VALUATIONS instead of only every FIVE or SEVEN years, and Annual Balance Sheets.
- 4th. This to be done under thorough governmental supervision by Statutory enactment, and an Insurance Superintendent.

The Confederation Life Association is the only Canadian Company that has furnished to the public these three conditions of safety, while the Board of Directors, by Memorial presented to the Minister Finance, and by personal representation sought to bring about the fourth.
