APRIL MAGAZINES.

In the April *Atlantic* we have an unfinished paper by Walt Whitman, An American Primer, characteristic in treating the origins of names and words, and demanding that they shall be apposite and historic, and vernacular above all. Herrick's continued story, The Common Lot, increases in power and in complication. Essays, literary papers, reviews, poems, and a lively Contributors' Club make up a varied and interesting number. . . . The *Canadian Magazine* is especially rich in color illustrations suitable to Easter. The stories are well written and interesting. Dr. William Saunders, Director of the Dominion Experimental Farm, in an article on Wheat Growing in Canada, shows that the Northwest may easily produce 800,000,000 bushels of wheat per annum, or four times the annual requirements of Great Britain. A paper on Soil Utilization, by E. Stewart, shows that Canada can best employ her waste lands by turning them into forests. . . . The April *Delineator* is an

uncommonly interesting magazine, from the standpoint of both fashion and literary features. Almost as good as a trip around the world, educationally, promises to be the pictorial series, Around the World in Eighty Pictures, the first instalment of which appears in this number. Nordica in Holiday Time is the subject of an enjoyable paper by William Armstrong. Land-n Knight's Romance of a Pair of Bluebirds is a story that will appeal strongly to lovers of Nature, and to all women. Dr. Grace Peckham Murray's article on the care of the ears and nose will be of deepest interest. In Beauty for Ashes Allan Sutherland tells of an interesting experiment that has been tried in several large cities of changing unbeautiful vacant lots into garden spots. . . . Conspicuous among the timely articles which *The Living Age* is furnishing its readers is The War and the Powers, by that shrewd observer who writes for *The Fortnightly Review* over the signature of "Calchas," which appears in the number for April 2. Equally notable, in the number for April 9, are The Slav and his Future, by the distinguished scholar, Emil Reich, and The War in the Far East, by Prince Kropotkin.
