

### Company Summary

St. Jude Medical Ltd. is a world leader in prosthetic heart valves. The company was established in 1981 as BioImplant Canada Inc. to produce and market worldwide the BioImplant porcine heart valve. In 1986, it was purchased by St. Jude Medical Inc. of St. Paul, Minnesota. Besides manufacturing and distributing the BioImplant, the company produces a bileaflet prosthetic heart valve made from pyrolytic carbon and a biological arterial graft made from treated collagen of bovine arterial origin for use in bypass or reconstructive surgery. St. Jude is strategically located near hog processing plants in Quebec.

*The St. Jude Medical heart valve for use as a replacement for a diseased, damaged or malfunctioning heart valve.*

Director of Sales

#### Products/Services

Therapeutic plaque remover and gumline massager

#### Company Summary

Sulcabrush Inc. was established in 1986 to manufacture and distribute a unique and efficient gumline massager. The company's North American patented Sulcabrush removes plaque, arrests bleeding gums and improves oral hygiene. In 1989, the product underwent a controlled clinical study at the University of Indiana's Faculty of Dentistry. The company anticipates the results (available late-1989) to generate a widespread professional interest in the purchase and recommended use of the Sulcabrush.

#### Company Summary

Established in 1965, Surgikos Canada Inc. is a subsidiary of Johnson & Johnson Corp., New Brunswick, New Jersey, U.S.A. The company is composed of four distinct marketing divisions that provide a wide and diverse range of products and services. The Surgikos division is a recognized leader in infection control, encompassing micro-organism transmission prevention and destruction. Major products include surgical and examination latex gloves, disposable hospital linens and apparel, disinfecting solutions and sterilization systems and components. The Codman division is a leading supplier of quality neuro-spinal diagnostic and surgical products in Canada while the Iolab Intraocular division specializes in surgical ophthalmic products. The pharmaceutical division markets pharmaceuticals for diagnostic, therapeutic and surgical applications through ophthalmic professionals.
