

Physics Department,  
University College, Cork.  
13th May, 1919.

Mr. Herbert Tate was a pupil of mine during the Session 1915-1916.  
His knowledge of Physics is wide and accurate.

For some time he acted as my demonstrator, and as a teacher of  
Physics he was most efficient.

I may add that he was in every way an excellent type of student.

WM. BERGIN, M.A.,  
Professor of Physics,  
University College, Cork.
