STUNNING LOSS OF **GERMANS IN EAST** 

Advance Against Russia Has Cost Three and a Half Million Men.

PLANS FRUSTRATED

Compelled to Withdraw Six Corps From Fighting Line for Reserves.

BY FREDERICK RENNET. cial Cable to The Toronto World. PETROGRAD, Aug. 18 .- A Russian expert, writing on the present lull in the German operations regarding Mackensen's army, which is known to be the chief factor in the plan for the envelopment of the Russian army, points out that the German list of losses, showing 1,616,761 casualties, does not include 26 Bavarian, 174 Saxon and 228 Wurtemberg lists, nor 40 lists of make a total of 3.500,000, to which must now be added 120,000 losses su-

tained by the Prussians during the last battle. These figures, he states, so stunned the German staff, that besides recognizing the frustration of its plan of envelopment, it was compelled to withdraw six corps from the fighting line. These were then used to form rew reserves. About two corps only amounting, in strength to two regiments, have been sent against Ser-bia or to assist Austria against Italy.

Can Last a Year.
It is considered here that the ab sence of fights along the left bank of the Bug is due to the Russian army having successfully established with the garrison of Brest-Litovsk. Russian general who left Novo Georvested, declares the fortress is abundantly supplied with victuals and mu-nitions sufficient to last a year. The fortress has been prepared to withstani a siege. The garrison is at its necessary strength and there are no unnecessary mouths to feed, all civilians having been expelled in time. The batteries and forts are similar to those of Oszowetz, which have been holding out against the strongest German artillery for many months.

The sanitary conditions of Nove

TO CALIFORNIA

Georgievsk are excellent.

Your Choice of Two Superb No-Extra-Fare Trains.

On your trip to California this summer your enjoyment will be much treater if your train affords you every Convenience and comfort en route.

The ideal trains to California are "The Pacific Limited" and the Francisco Limited" of the Cricago, Mil. waukee & St. Paul Railway. Both trains are operated through to San Francisco without change of "The Pacific Limited" also provides

equal service to Los Angeles. The fares are so unusually low this year that you will surely want to take full advantage of them. little to the direct round trip cost you can see the wonderful Pacific North mountain wonderland pierced by the "Milwaukee's" picturesque "Trail The Olympian." This route affo varied scenery viewed from the train ernment in Mexico. than any other road on the continent.

**NEW TYGARD TYPE** OF ROTARY ENGINE

Successful Demonstration at Polson Iron Works Scen by Experts.

TO BE MADE IN TORONTO

Canadian Company Will Be Financed by Local Business Men.

A demonstration of the Tygard type of rotary engine, given at the Polson Iron Works yesterday afternoon, proved a revelation to the members of the engineering fraternity who took advantage of the opportunity to examine the invention which, it is claimed, will revolutionize marine, locomotive, industrial and every kind of use to which the steam engine has been put, and which trial and every kind of use to which the steam engine has been put, and which will be applied to gasoline engines as well. After twenty years of experimenting, James W. Tygard has begun to reap the fruits of his toil, and after successfully establishing the Tygard Rotary Engine Company in the United States he has arranged to have a separate company established in Canada and Great Poitting as well. pany established in Canada and Great Britain as well. "The Canadian concern will be financ-

"The Canadian concern will be infanced entirely by the business men of Toronto and other Canadian cities. The engines will be manufactured with the backing of Canadian capital and for Canadian use," stated Mr. Tygard after Canadian use, stated bit. Canadian works, his demonstration at the Poison Works,

who have now arranged to manufacture the marine type of engines. After giving a demonstration with the engine resting on a platform, it was operated equally successful suspended from a chain, and was instantly reversed while traveling at a speed of 3000 revolutions a minute. Long-distance control of the engine by means of wires was also shown, by which the reverse could be applied to a ship's engine from the bridge at an instant's notice, and would practically eliminate danger of a disaster such as befell the Titanic. The engine itself is an extremely simple affair, consisting of four moving parts, each of which revolve, forming a complete the economizing of steam and the gyroscopic action. The great features are the economizing of steam and the ease with which the reverse can be applied, marking an immense advantage over the turbine engines.

After the demonstration speeches were made by W. D. MacPherson and F. G. Moroe. Mayor Church was present and welcomed the company to the city, wishing it every success. tho have now arranged to manufacture ing it every success.
