NAVY BOYS LEAVE ON FIRST CRUISE

Schooner-Rigged Yacht Departs From Toronto With Fifty-Two Lads Aboard.

Favored by the best of weather, with perhaps too light a wind, the schoon-er-rigged yacht "Wave Crest," left the York street dock Saturday after-noon with 52 boys of the Boys' Naval Brigade, on the first of a series of two-week trips around the Ontario coast. A large gathering of sight-seers waved good-bye to the boys as the boat left the wharf, and the former owner of the yacht, F. H. Wehrley, wished them godspeed. Among those who watched the departure of the navy lads to ports unknown were the rigged craft.

The object of the cruise is to give the boys training in the rudiments of naval routine, and will occupy two weeks. Among the guests is Com-modore A. D. Ellis, a veteran yachtsman, who is a member of the exe-cutive of the Navy League. The skip-per, Captain Redfern, is a veteran lake captain, and among the best known men in the lakes service. The ship will fly the only royal ensign permissable on the great lakes, having royal sanction to do so. Other members of the personnel of the cruise include the first mate, John Hunter; boatswain's mate, Albert Edward Searle, in July and again in August to determine the winner of the society's cash prize which has been offered 1875, and participated in the Battle of Hoover, American food administrator in Tel-el-Kebir, and another navy veter-

chief of routine on board.

CELEBRATES JUBILEE

Takes Interest in Design of New Bank Notes to Be Issued on Occasion.

On Wednesday, July 24, Sir Edmund Walker will have completed fifty years of service with the Canadian Bank of Commerce. In 1868 he began his career as a junior clerk in the Hamilton branch, and a few years later his natural aptitude gained for him promotion to the agency of the bank in New York City. In 1886 he became general manager, and in 1907 was appointed president, which posi-

only give the reader a very slight idea of its beauty. On the face of the \$5 note the main feature is a group in the centre consisting of Mercury holding the Caducous, supported on the left by a goddess representing Architecture, and on the right by another goddess representing Invention and holding in her hands the model of a flying machine. The note is surrounded by a frame of immortelles, fruits and vines. The backs of all the notes of the series consist of a central group of Microury and Cercs holding the Britist Crown over the seal of the bank, the whole included in a frame of immortelles and other symbolic objects.

In private life Sir Edmund has devoted much of his leisure time to his son, Pte. W. G. Robins, who left music and painting, and the designs gestions.

For some years the bank has been desirous of having an issue of notes that would be distinctive, and it was thought best to use symbolic designs summoned to attend a special meeting. that would be distinctive, and it was thought best to use symbolic designs rather than the portraits of the bank's officers and illustrations of buildings, which has been so customary in other issues. Much time and labor has been spent on the designs, which are indeed beautiful. In fact, over a year was spent in an effort to secure an artist who, it was felt, could properly work out the ideas. So far only the \$5 and \$10 notes have been completed, and these will be issued to the public on July 24. The \$20, \$50 and \$100 notes will appear gradually during the next two or three years.
