Wheat—Important bullish news in the wheat shape of crop damage and harvest weather in Argentine, and unspected large decrease in the visible supply, was offset in a measure by the bearish government crop reports, reported speculation and a little outside short selling, evidently based on the government report. The foreign reports reflect in a measure the strong news from Argentina. The government figures show a high condition for winter wheat and a slight increase over last year sead gain of .06 per cent,; acreage given is 31-341,000, and condition 941, v. 31,135,000 acres and condition 941, v. 31,135,000 acres and condition for syntate elevators over Sunday, about 125,000 bushels, versus 1,538,000 bushels versus 1,538,000 bushels corresponding day last year.

World's shipments for week, as expected, 12,752,000, versus 13,936,000 week before, and 9,288,000 bushels year ago.
